Thanks for purchasing techXams' Study Guide,

techXams' 000-204 study guide is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this guide. An average of approximately 10 to 20 hours should be spent to study this guide and you will surely pass your exam. It's our guarantee.

Question: 1

Which IBM N series licensed feature enables a writable replica of the flexible volume?

- A. FlexCache
- B. FlexClone
- C. SnapMirror
- D. Snapshot

Answer: B

Question: 2

A customer has five divisions in a single data center. They want a separate fabric for each of these divisions. They also want all tape devices to be corporate resources that are shared across the SAN fabrics. Each of these fabrics must have the ability to expand and support up to 239 domains. The customer wants a cost-effective solution that minimizes the number of major physical SAN components, such as switches and directors. Which solution meets these requirements?

- A. Five IBM SAN256B directors and an IBM SAN16B-2 switch interconnected by an IBM SAN16B-R router
- B. Five IBM SAN256M directors and an IBM SAN24M-1 switch interconnected by an IBM SAN16M-R router
- C. One Cisco MDS 9509 director with the VSAN feature
- D. One IBM SAN M14 director and an IBM SAN16B-2 switch interconnected by an IBM SAN16M-R router

Answer: C

Question: 3

A customer has a Microsoft Windows 2003 server that is attached to a SAN fabric via redundant Fibre Channel HBAs to an IBM DS4700. The server needs to attach to an IBM DS8300 through the same fabric. RDAC is currently being used on the server. Redundancy is the highest priority for each connection. How many Fibre Channel HBAs are required in the server to maintain redundancy for each disk subsystem connection?

- A. 2; both drivers can run simultaneously on the same adapter
- B. 2; one adapter running RDAC and one adapter running SDD
- C. 3; SDD runs on one adapter, RDAC runs on one adapter, and both are loaded onto the third for failover
- D. 4; two adapters for RDAC and two adapters for SDD

Answer: D

Question: 4

What is the maximum number of ports supported by the N3600?

- A. 1024
- B. 512
- C. 256
- D. 2048

System Storage

Answer: A

Question: 5

A customer has LAN-based storage. The customer does not want to migrate to SAN storage. The customer would like to utilize

- A. FCIP
- B. iFCP
- C. iSCSI
- D. FCP

to SAN storage. Which protocol requires channel HBAs, but does not require this?

Answer: C

Question: 6

What is the maximum number of ports supported by a switch when the gateway is configured?

- A. 1
- B. 2
- C. 4

gateway and a switch?

Answer: B
