Question: 1

A cluster member has suddenly crashed. The administrator is concerned about aborted transactions holding locks in the database. What can an administrator do to release the locks?

- A. Unmount the shared file system such as a Network Attached Storage (NAS) where the transaction log is stored
- B. Restart the deployment manager and node agents who manage the transaction log
- C. Verify another running cluster member has access to the transaction log
- D. Reconnect the database where the transaction log is stored

Answer: C

Question: 2

What functionality does the Caching Proxy server provide?

- A. Reverse proxy and content-based routing
- B. Dynamic content caching and integration with servlet caching
- C. File serving enabler
- D. HTTP compression
- E. Integration with Dynacache and third party object caches

Answer: A, B

Question: 3

What is needed to load balance the HTTP traffic across a cluster of Web servers?

- A. Configure a proxy server such as Tivoli Access Manager (TAM)
- B. Enable server affinity for each HTTP server in the cluster
- C. Implement the caching proxy server component of the WebSphere Edge
- D. Use an IP sprayer from the load balancing component of the WebSphere Edge Components

Answer: D

Question: 4

What does a WebSphere application server provide to support the installation and deployment of JSR 168 compliant portlets?

- A. An embedded portlet container
- B. A scaled-down version of the WebSphere Portal Server
- C. Several J2EE applications that render and aggregate portlets in a browser
- D. An embedded version of WebSphere Portal Express

2

Answer: A

Question: 5

Which two components are used to manage the deployment of applications?

- A. Node agent
- B. Web server plug-in
- C. Caching proxy
- D. Deployment manager
- E. Load balancer

Answer: B, E

Question: 6

Which services are included in the WebSphere Application Server Network Deployment (DRS) profile?

- A. Security, JMS message service
- B. The user registry
- C. HTTP Load Balancer
- D. Security, Naming

(DRS)

Answer: D

Question: 7

Session Initiation Protocol (SIP) files are used to create archive files.

archive file?

- A. SAR
- B. WAR
- C. JAR
- D. EJB-JAR
- E. SIP-JAR

Answer: A
