

000-551

(IBM Optim Implementation for Distributed Systems (2009))

Document version: 9.30.06

Important Note, Please Read Carefully

techeXams' 000-551 Exam is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this exam questions. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. It's our guarantee.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at techeXams and update 3-4 days before the scheduled exam date. Here is the procedure to get the latest version:

1. Go to <http://www.techeXams.ws/>
2. Log in the User Center
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you find any possible improvement, then please do let us know. We are always interested in improving the quality of this product. Feedback can be send at: customer.service@techeXams.ws

Explanations

This product does not include explanations for all questions at the moment. If you are interested in providing explanations for this exam, please contact customer.service@techeXams.ws.

Question: 1

You have installed the Optim Server on an AIX system. The system is configured with various internal and external storage options attached to the server. Where should the Optim Temporary Work folder be placed?

- A. The attached archive appliance
- B. The attached NAS device
- C. The system's internal disk drives
- D. The attached SAN device

Answer: C

Question: 2

When performing an archive process that uses a Storage Profile, which action could be performed as a result of using the storage profile?

- A. Creates a connection to the database for use by the storage management device.
- B. Creates a connection to the storage management device and copies an Archive File to a backup device.
- C. Creates a storage allocation parameter for the storage or file management system.
- D. Creates a duplicate of the existing information from the Archive Repository on the storage management device.

Answer: B

Question: 3

When using InfoSphere Federation Server to access Optim extended data sources, what must be created to define a federated object?

- A. A wrapper, a system definition, a user mapping, and a nickname
- B. A wrapper, a server definition, a user mapping, and a DB Alias
- C. A wrapper, a system definition, a nickname, and a DB Alias
- D. A wrapper, a server definition, a user mapping, and a nickname

Answer: D

Question: 4

What are three valid levels of Optim Security? (Choose three.)

- A. Database Security
- B. Object Security
- C. Functional Security
- D. Network Security
- E. Archive File Security

Answer: B, C, E

Question: 5

You have exported an Archive Request and checked the 'export subordinate definitions' box. Which types of objects might you expect to find in the export file?

- A. Archive Request, Access Definition, Optim Relationships, Optim Primary Keys
- B. Archive Request and Access Definition only
- C. Archive Request, Access Definition, and Table Map
- D. Archive Request, Access Definition, Storage Profile, Report Request

Answer: D

Question: 6

Given the command line syntax shown below: PROCMD /R JOB=PERSONNEL' OUTPUT=PER.TXT MONITOR+ QUIET+ Which task is performed?

- A. Runs the job named PERSONNEL, places the process report output in a file named PER.TXT, and displays prompts and error dialogs during the process.
- B. Schedules a job named PERSONNEL, stores the extracted data in a file named PER.TXT, and displays information dialogs during the process.
- C. Runs the job named PERSONNEL, places the process report output in a file named PER.TXT, and displays information dialogs during the process.
- D. Schedules the job named PERSONNEL, stores the extracted data in a file named PER.TXT, and displays prompts and error dialogs during the process.

Answer: C

Question: 7

What are two possible locations where would you could find the fetch strategy chosen by Attunity when working with an extended data source? (Choose two.)

- A. nav.log
- B. irpcd.log

- C. optdbg.xml
- D. db2trc file
- E. admin_svc.log

Answer: A, C

Question: 8

Click the Exhibit button. Given this information from the Relationships tab of an Access Definition, and the information from this Show Steps report in the exhibit, why is the STATE_LOOKUP table listed as UNTRAVERSED?

	Status	Select	Options		Child Limit	Parent Table	Child Table
			(1)	(2)			
1		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>		CUSTOMERS	ORDERS
2		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>		ITEMS	DETAILS
3		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>		ORDERS	DETAILS
4		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>		SALES	STATE_LOOKUP
5		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>		SALES	CUSTOMERS

Step 1:
 Extract Rows from Start Table ORAOPTIM SAMPLE ITEMS. No Point and Shoot List. Selection Criteria or Statistical Controls used, therefore Start Table does not need to be revisited, even if part of a Cycle.

Step 2:
 Extract Rows from ORAOPTIM SAMPLE DETAILS which are Children of Rows Previously Extracted from ORAOPTIM SAMPLE ITEMS in Step 1 using Relationship RID.

Step 3:
 Extract Rows from ORAOPTIM SAMPLE ORDERS which are Parents of Rows Previously Extracted from ORAOPTIM SAMPLE DETAILS in Step 2 to satisfy an RI rule using Relationship ROD.

Step 4:
 Extract Rows from ORAOPTIM SAMPLE CUSTOMERS which are Parents of Rows Previously Extracted from ORAOPTIM SAMPLE ORDERS in Step 3 to satisfy an RI rule using Relationship RCO.

Step 5:
 Extract Rows from ORAOPTIM SAMPLE SALES which are Parents of Rows Previously Extracted from ORAOPTIM SAMPLE CUSTOMERS in Step 4 to satisfy an RI rule using Relationship RSC.

Untraversed Table(s):
 ORAOPTIM SAMPLE STATE_LOOKUP

- A. There is no active relationship for the STATE_LOOKUP table.
- B. Q2 needs to be activated between SALES and STATE_LOOKUP.

- C. Q1 needs to be de-activated between SALES and STATE_LOOKUP.
- D. The relationship between SALES and STATE_LOOKUP is unselected.

Answer: B

Question: 9

An Archive File Collection is a list of Archive Files that are treated as a single data source by Open Data Manager (ODM). Which two statements are true regarding Archive Collections? (Choose two.)

- A. Use the Collections tab on the Archive Request Editor to specify the collection(s) in which the Archive File should be added automatically.
- B. An Archive File may belong to multiple Archive Collections, and an Archive Collection may contain multiple Archive Files.
- C. Archive Files contained within a collection do not need to be registered in the Archive Directory.
- D. ODM, by default, processes the Archive Files in the collections in ascending date order based on the dates the Archive Files were created.
- E. An Archive File containing multiple tables with the same names and creator ids, but with different DB Aliases, may be stored in an Archive Collection.

Answer: A, B

Question: 10

You can specify the default minimum retention period for protecting Archive Files on Centera from deletion. How is the minimum retention period calculated?

- A. From the time Centera copies the file
- B. From the time the Archive Process copies the file to Centera
- C. From the time that the Archive Process copies the file to the local file system
- D. From the time Centera copies the file from the local file system

Answer: B

Question: 11

In Attunity, where is the metadata stored?

- A. On the server where IRPCD is running.
- B. In XML files where it can be manually updated.
- C. In the Optim Directory where the DB Alias is found.

D. On the client where Attunity Studio is running.

Answer: A

Question: 12

Which performance
during an extract or

- A. Multiple database connections are used simultaneously.
- B. Multiple database connections are used concurrently.
- C. Multiple database connections are used simultaneously.
- D. Multiple database connections are used sequentially.

provide when used

- A. Multiple tables
- B. Single table
- C. From Reference Tables
- D. Only during delete.

Answer: B

Question: 13

The Optim Initializa

- A. Observes what is going on in the system.
- B. Automates the process of creating the system.
- C. Ensures that the system is running properly.
- D. Changes the request to the system.
- E. Adds support to the system.

Choose three.)

- A. Observes what is going on in the system.
- B. Automates the process of creating the system.
- C. Ensures that the system is running properly.
- D. Changes the request to the system.
- E. Adds support to the system.

Answer: A, C, D
