## Question: 1

**A customer wants to establish an off-site tape rotation. Part of this process would be the check-in and check-out of tapes from the library. In addition, when a tape remains off-site for some time, data on it can become expired, thus having unused space on it. As a result of this, off-site tape reclamation is planned to be used in order to optimize tape utilization. Which two statements are true about off-site reclamation? (Choose two.)**

- A. The server obtains valid files only from an on-site volume of a copy storage pool or active-data pool.
- B. When an off-site volume is reclaimed, the files on the volume are rewritten to another read/write volume.
- C. The server obtains valid files only from another on-site volume of a copy storage pool, which has the same data on it.
- D. The server obtains valid files from a primary storage pool or, if necessary, from an on-site volume of a copy storage pool or active-data pool.
- E. The default value of the reclamation parameter in an off-site storage pool is the same as for a primary sequential storage pool (for example, 60).

Answer: B, D

## Question: 2

**Which three options may be changed with the setopt command? (Choose three.)**

- A. Shredding
- B. Logpoolsize
- C. Bufpoolsize
- D. Commtimeout
- E. Commmethod
- F. Dbpageshadow

Answer: A, C, D

## Question: 3
