

## **000-M80**

(IBM ISW-9.7 & Smart Analytics Technical Mastery Test v1)

Document version: 11.05.07

## Important Note About 000-M80 PDF

techeXams' **000-M80 PDF** is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this exam questions. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. It's our guarantee.

Question: 30

**What are the steps required before a Calculated Measure can be used in an OLAP cube?**

- A. Add the new measure to the Fact Table in the database.
- B. Add the new measure to the Fact Table in the data model.
- C. Add the new measure to the cube and then add it to the cube model.
- D. Add the new measure to the cube model and then add it to the cube.

Answer: D

Question: 32

**Which of the following is NOT a valid technique/algorithm used in InfoSphere Warehouse Data Mining?**

- A. Clustering
- B. Differentiation
- C. Classification
- D. Association

Answer: B

Question: 33

**The UIMA standard allows**

- A. importing of cubes from other applications
- B. importing of logical models from other applications
- C. importing of text annotators from other sources
- D. importing of physical models from other applications

Answer: C

Question: 34

**What is NOT included in the IBM Cognos BI suite of products?**

2

- A. Report Studio
- B. Query Patroller
- C. Cognos Connection
- D. Query Studio

Answer: B

Question: 36

**What option of the InfoSphere Warehouse Administration Console's SQL Warehousing menu is used to immediately execute a deployed application?**

- A. Manage Control Flows Select a Control Flow Click Start Icon
- B. Manage Applications Select an Application Click Start icon
- C. Manage Instances Select an Instance Click Start Icon
- D. Manage Applications Select an Instance Click Start icon

Answer: A

Question: 37

**A cube has been designed in Design Studio. What step(s) is(are) required to make it available to an existing cube server?**

- A. Deploy metadata to the database
- B. Add the cube to the cube server
- C. Start the cube server and cube
- D. All of the above

Answer: D

Question: 38

**Which of the following data warehouse schema CANNOT be modeled into a Cube Model object?**

- A. A non-star schema.

- B. A star schema that contains a set of fact tables and a set of dimension tables that join the fact tables.
- C. A star schema in which all attributes of a dimension are stored in a single dimension table.
- D. A star schema in which some of the dimension attributes are stored in the same table where fact attributes are stored.

Answer: A

Question: 39

**When preserving a mining model's rules in a relational table, which mining operator is needed?**

- A. An annotator
- B. A visualizer
- C. An introspector
- D. There is no function to do this.

Answer: C

Question: 40

**Which of the following can be used to control looping through an iteration process in a Control Flow?**

- A. A series of delimited items in a file
- B. A series of files in a directory
- C. Specification of a fixed number of operations
- D. All of the above

Answer: D

Question: 41

**Which of the following is NOT a way that a cube server can be started?**

- A. As a service
- B. From a Command line or script

- C. Using the InfoSphere Warehouse Administration Console
- D. Using the Start Cube Server?icon within Design Studio

Answer: D

Question: 43

**Which statement is TRUE about the Cubing Services component of InfoSphere Warehouse 9.7?**

- A. Creates OLAP cubes in a separate database.
- B. Provides access to OLAP data managed in an InfoSphere Warehouse.
- C. Provides SQL-only access to OLAP data.
- D. Provides access only for IBM Alphablox.

Answer: B

Question: 44

**An InfoSphere Warehouse control flow is executed as**

- A. a ZIP file
- B. an XML file
- C. a binary executable file
- D. a WebSphere process

Answer: D

Question: 45

**What step(s) are necessary to specify a database for a deployed application that is different than the database used for design?**

- A. The deployment database must be defined as a data source.
- B. The deployment database must be mapped to the application.
- C. The deployment database must be defined as a data source and then mapped to the application.

D. You cannot change the database from the one that was used for design.

Answer: C

## Get Full Version of Exam 000-M80 PDF Q&A

techeXams presents authentic, genuine and valid study material, which promise 100% success in very first attempt. To take optimal results for 000-M80 exam, you need to buy full version of 000-M80 question and answer. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. So come join us and quench your thirst for knowledge.
