Question: 1

Your Sametime server is referred to in DNS as `sametime.company.com` and `collaboration.company.com`. You have created a new DNS entry as `presence.company.com` but your Sametime server refuses to answer connections for this name. Which of the following is the best solution for this issue presuming DNS is functioning correctly in your environment?

- A. You have left the "host name" field of Community Services Network settings blank
- B. You have not entered the hostname `presence.company.com` into the server's `notes.ini` file
- C. You have entered `sametime.company.com` and `collaboration.company.com` into the "host name" field of Community Services Network settings
- D. You did not enter the name `presence.company.com` into the network name field on the Domino server document that hosts the Sametime server

Answer: C

Question: 2

Your Sametime environment has users that utilize the Sametime Connect for browsers client. You wish to alter the default connectivity settings by performing which of the following steps?

- A. Manually enter the server address into the Sametime servlet
- B. Add an applet parameter to the HTML code on the Sametime server
- C. Prepare a secure desktop installation of the Sametime Connect for browsers for the kiosks
- D. Create a kiosk mode document in `stconfig.nsf` that specifies all the required settings for browser connections

Answer: B

Question: 3

While configuring the RTC Gateway, you have to account for all of your company domains as part of the local community. If your company domains are listed as follows: `acme.com` `west.acme.com` `east.company.com` `europa.company.com` Which of the following is allowable to include all of your company domains in the RTC Gateway configuration?

- A. `*.com`
- B. `Acme.com`, `company.com`
- C. `*.acme.com`, `*.company.com`
- D. `Acme.com`, `west.acme.com`, `east.company.com`, `europa.company.com`

Answer: C

Question: 4

As the Sametime administrator, you want to ensure that all connections over port 443 are encrypted. Which of the following functions correctly?

- A. Multiple IP addresses are used
- B. Sametime must be configured to use SSL
- C. Web connections must be given a higher priority
- D. The SSL certificate must be installed on the Domino Web server

When using the Sametime client to connect to a server over HTTPS, how connections via port 443 are encrypted. Which of the following functions correctly?

- A. Multiple IP addresses are used
- B. Sametime must be configured to use SSL
- C. Web connections must be given a lower priority
- D. The SSL certificate must be installed on the Domino Web server

Answer: A

Question: 5
