Question: 1

Scenario: John, a Citrix administrator, needs to enable the synchronization of PDA devices for both local and remote users. Users will connect from the LAN to the Web Interface. Which two options allow John to accomplish this? (Choose two)

- A. In the Microsoft Management Console, John can add the Device Manager snap-in.
- B. The Presentation Server Console, John can enable the automatic sharing of PDA devices in server properties.
- C. In the Presentation Server Console, John can create a policy under properties and enable the policy rule "Turn on automatic virtual COM port mapping".
- D. In the Access Suite Console, John can create a MetaFrame Presentation Server site, select Manage Client Connection settings and enable the PDA settings.

Answer: C, D

Question: 2

Scenario: You created a policy for the Human Resources group which restricts the users in that group from accessing local drives. Human Resources has recently added five new recruiters to the team who will travel to universities throughout the country to recruit candidates. While on these trips the recruiters will need to save data to their laptops and upload information nightly to the database which is published and load-balanced across all servers in the farm. You create a new policy for the recruiters called "HR recruitment" and disable the rule which restricts the access to the client drives.

Which two filter types should be applied to the "HR recruitment" policy to exclude the recruiters from the client drive mapping rule? (Choose two)

- A. Server
- B. Location
- C. Client names
- D. Users and user groups
- E. Connections made through controlled access

Answer: C, D

Question: 3

Scenario: You created several policies and configured filters for them in the Presentation Server Console. You now wish to verify the enforcement of these policies on specific user accounts in your enterprise. How can you view the effective Citrix policies for these user accounts?

- A. Filter the policies by user on the Policy Management Console.
- B. From the client device execute the GPRESULT application.
- C. In the Presentation Server Console, select Tools, Wizards, Effective Policy Wizard.
- D. In the Presentation Server Console, execute the search function focused on the target user accounts and click "View Resultant Policy".

2

- A. Default user
- B. SpeedScreen
- C. Remote Audio
- D. Production Audio

Answer: C

Question: 7

What is the purpose of the MetaFrame database?

- A. It handles queries
- B. It ensures that the database is available.
- C. It provides data replication over a TCP connection.
- D. It stores server information locally for the MetaFrame Presentation Server.

database is
 e over a TCP
 n locally for

Answer: B

Question: 8

Which three types of data are stored in the MetaFrame database? (Choose three)

- A. License files
- B. User profiles
- C. Printer drivers
- D. Published applications
- E. Presentation Server configuration

Server farm data

Answer: C, D, E

Question: 9

What is contained in the MetaFrame database?

- C. License files
- D. Persistent user profiles

Answer: D

Question: 10

Which component manages the servers in the MetaFrame presentation by integrating with third-party management consoles such as HP OpenView?

- A. Load Manager

1Y0-256 Demo Exam

- B. Network Manager
- C. Resource Manager
- D. Installation Manager

Answer: B

Question: 11

In the Presentation Server, how do you install a package using the Project Wizard?

- A. Project Wizard
- B. The administrator uses the Project Wizard to install a package to a local drive or a network share.
- C. Only packages can be installed to a local drive or a network share.
- D. Project Wizard can be used to install a package to a local drive or a network share.

How do you install a package using the Project Wizard?

- A. The administrator uses the Project Wizard to install a package to a local drive or a network share.
- B. Only packages can be installed to a local drive or a network share.
- C. Project Wizard can be used to install a package to a local drive or a network share.
- D. The administrator uses the Project Wizard to install a package to a local drive or a network share.

Answer: A

Question: 12

Scenarios: You create a package and want to keep the records of the package. Within the package, where do you store the records?

- A. From the File Name field
- B. From the File Name field
- C. From the Tools field
- D. From the Tools field

Where do you store the records of the package?

Answer: A

Question: 13

What is required for a package to be installed on a server?

- A. Project Wizard
- B. Data Center
- C. Installer Service
- D. Access Suite Console

What is required for a package to be installed on a server?

Answer: C
