Answer: D

Question: 4.

Which describe the role room acoustics play regarding acoustic echo cancellation? (Select 2 answers.)

. People moving around in a room change the acoustic paths presented to a microphone. . Fans, heaters, and air conditioners add background noise to the room, changing the room acoustic paths. . Hard room surfaces act as reflectors for sound, causing multiple acoustic paths from loudspeaker to microphone. . Heavy drapes and acoustic absorbers remove acoustic paths and therefore cause problems for acoustic echo cancellers.

2

Answer: A, C
