

1Z0-055

(Oracle Database 11g: New Features for 9i OCPs)

Total Questions: 195

Last Updated: Mar 09, 2009

Document version: 8.27.11

Thanks for purchasing techXams' Study Guide,

techXams' 1Z0-055 study guide is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this guide. An average of approximately 10 to 20 hours should be spent to study this guide and you will surely pass your exam. It's our guarantee.

Disclaimer

Question: 1

Examine the following PL/SQL block:

```
SET SERVEROUTPUT ON SET LONG 10000 DECLARE report clob; BEGIN report :=
DBMS_SPM.EVOLVE_SQL_PLAN_BASELINE(); DBMS_OUTPUT.PUT_LINE(report); END;
Which statement describes the effect of the execution of the above PL/SQL block?
```

- A. The plan baselines are verified with the SQL profiles.
- B. All fixed plan baselines are converted into nonfixed plan baselines.
- C. All the nonaccepted SQL profiles are accepted into the plan baseline.
- D. The nonaccepted plans in the SQL Management Base are verified with the existing plan baselines.

Answer: D

Question: 2

View the Exhibit to examine the details for an incident. Which statement is true regarding the status of the incident?

- A. The DBA is working on the incident and prefers that the incident be kept in the ADR.
- B. The incident is now in the Done state and the ADR can select the incident to be purged.
- C. The incident has been newly created and is in the process of collecting diagnostic information.

D. The data collection for the incident is complete and the incident can be packaged and sent to Oracle Support.

Answer: D

Question: 3

You want to convert a database to a new database PROD.
 Which method or command would you use?

- A. Data Pump Export and Import
- B. conventional export and import
- C. the CONVERT command
- D. the BACKUP AS COPY command

Answer: D

Question: 4

Which are the prerequisites for a backup of your database?
 (Choose all that apply)

- A. Supplemental logging
- B. Supplemental logging and archive mode
- C. Undo retention
- D. Execute permissions on the user.

Answer: A, B, D

Question: 5

Which method would you use to roll back a transaction
 without affecting the rest of the database?

- C. Flashback Database
 - D. Deterministic Redo Log
- and use them to roll back the transaction.

Answer: D

Question: 6

When executing a SQL workload, you choose to generate execution plans only, without collecting execution statistics. Which two statements describe the implications of this? (Choose two.)

- A. It produces less accurate results of the comparison analysis.

- B. It automatically calls the SQL Tuning Advisor for recommendations.
- C. It shortens the time of execution and reduces the impact on system resources.
- D. Only the changes are detected.

Answer: A, C

Question: 7

While deploying a new application along with a new feature, the application is being introduced. Which two statements are true?

- A. The plan baseline is created before the new SQL statements are introduced.
- B. The newly generated SQL plan is verified without being used.
- C. The new SQL statements are used to produce good performance under the current plan.
- D. The optimizer does not generate a new plan until the SQL plan baseline has been introduced.

Answer: A, C

Question: 8

In your database, the initialization parameter `SQL_TUNE_POOL_SIZE` is set to 100. The following SQL statement is executed:
SQL>SELECT /*+ RESULT_CACHE */ sales GROUP BY sale_category;
Where would the result cache be stored?

- A. PGA
- B. Large pool
- C. Shared pool

Answer: C

Question: 9

Identify the activities performed by the SQL Tuning process in the maintenance window? (Choose all that apply.)

- A. Generating the SQL profile
- B. Testing and accepting the SQL profile
- C. Generating a list of candidate SQLs for tuning
- D. Adding tuned SQL plans into the SQL plan baseline
- E. Tuning each SQL statement in the order of importance
- F. Generating baselines that include candidate SQL statement for tuning

4

Answer: A, B, C, E

Question: 10

You performed an in-place upgrade of the database to Oracle Database 11g. You set the `LOG_ARCHIVE_DEST_1` parameter to `LOG_ARCHIVE_DEST_1=LOCAL`. Which statement regarding the database, is true?

- A. The archived redo logs are not unique.
- B. The archived redo logs are unique.
- C. The archived redo logs are not unique, but the redo logs are unique.
- D. The archived redo logs are unique, but the redo logs are not unique.

the RESETLOGS option. The LOG_ARCHIVE_DEST_1 parameter is set to 'LOCAL'. Which statement regarding the database, is true?

redo logs are unique.

Answer: D

Question: 11

View the Exhibit for Questions 10 and 11. The `PRODCAT` table is used to create the `PRODCAT_VW` view. The `PRODCAT_VW` view is used in the `CHECK_DATA` function. How does this impact the `PRODCAT` table?

Table						
<table border="1"> <thead> <tr> <th>PRODUCTS</th> </tr> </thead> <tbody> <tr> <td>PROD_ID</td> </tr> <tr> <td>PROD_NAME</td> </tr> <tr> <td>PROD_DESC</td> </tr> <tr> <td>PROD_CAT</td> </tr> <tr> <td>PROD_RATE</td> </tr> </tbody> </table>	PRODUCTS	PROD_ID	PROD_NAME	PROD_DESC	PROD_CAT	PROD_RATE
PRODUCTS						
PROD_ID						
PROD_NAME						
PROD_DESC						
PROD_CAT						
PROD_RATE						

The `PRODCAT` table is used to create the `PRODCAT_VW` view.

in the `CHECK_DATA` function. How does this impact the `PRODCAT` table?

- B. Only the `PRODCAT` table is used.
- C. Only the `PRODCAT_VW` view is used.
- D. Only the `PRODCAT` table is used, but the `PRODCAT_VW` view is used the next time they are called.

is used. The `PRODCAT_VW` view is used the next time they are called.

Answer: A

Question: 12

Which of the following are the main uses of the SQL Tuning Advisor? (Choose two.)

- A. ADR diagnostic
- B. All the optimizer
- C. Initialization pa
- D. PL/SQL function
- E. The table and in

Answer: B, C, E

Question: 13

Your system has been upgraded to Oracle Database 11g. You have imported SQL Tuning Advisor (STA) plans from the previous version of the database. You are using the SQL Tuning Advisor to analyze the SQL Performance Analyzer (SPA) results. What would you do with these SPA results?

- A. Set OPTIMIZER_FEATURES_ENABLE to 11.1.0.
- B. Capture the plan into the SQL Tuning Advisor outline.
- C. Capture the plan into the SQL Tuning Advisor Management Base Table.
- D. Set OPTIMIZER_FEATURES_ENABLE to 11.1.0 and load the SQL Tuning Advisor plans into the SQL Tuning Advisor.

- A. Import the compressed plans.
- B. Import the plan into the stored SQL Tuning Advisor.
- C. Import the plan into SQL Tuning Advisor.
- D. Import the plan into the SQL Tuning Advisor and prevent the plans from being loaded.

Answer: C

Question: 14

Which of the following is a valid reason to use the SQL Tuning Advisor?

- A. To capture the plan into the SQL Tuning Advisor.
- B. To add the plan to the SQL Tuning Advisor.
- C. Enabling the SQL Tuning Advisor.
- D. Setting the OPTIMIZER_FEATURES_ENABLE to 11.1.0.

Answer: A

Question: 15

An online tablespace, TEST_TBS, is full and you realize that no server-managed tablespace threshold alerts were generated for the TEST_TBS tablespace. What could be the reason, if the TEST_TBS tablespace does not include autoextendible data files?

- A. TEST_TBS is a small file tablespace.
- B. TEST_TBS is a bigfile tablespace (BFT).
- C. TEST_TBS is the
- D. TEST_TBS is a di

Answer: D

Question: 16

While performing the backup of the archived redo log files. What implications

- A. The backup succeeds.
- B. The backup fails.
- C. The backup succeeds for all destinations.
- D. During backup, the backup fails for the log file.

one of the archived redo log files is in the backup area?

- A. The backup fails for the archived redo log file.
- B. The backup succeeds for all destinations.
- C. The backup fails for the archived redo log file.
- D. During backup, the backup fails for the archived redo log file.

Answer: C

Question: 17

Which two statements are true regarding the Oracle Managed Files (OMF) feature?

- A. A DBA can enable OMF for a database.
- B. A DBA cannot change the OMF location.
- C. In case of a long backup window, OMF files are created every four hours.
- D. A DBA can control the OMF file names using Tasks in each window.

Which two statements are true regarding the Oracle Managed Files (OMF) feature?

- A. A DBA can enable OMF for a database.
- B. A DBA cannot change the OMF location.
- C. In case of a long backup window, OMF files are created every four hours.
- D. A DBA can control the OMF file names using Tasks in each window.
