

## **1Z0-058**

**(Oracle Real Application Clusters 11g Release 2 and Grid Infrastructure Administration)**

Document version: 08.10.11

## Important Note About 1Z0-058 PDF

techeXams' **1Z0-058 PDF** is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this exam questions. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. It's our guarantee.

## Question: 1

**Which three actions would be helpful in determining the cause of a node reboot?**

- A. determining the time of the node reboot by using the update command and subtracting the up time from the current system time
- B. looking for messages such as "Oracle CSSD failure. Rebooting for cluster integrity" in /var/log/messages
- C. using the crsctl command to view tracing information
- D. inspecting the ocssd log for "Begin Dump" or "End Dump" messages
- E. inspecting the database alert log for reboot messages

Answer: AEB

## Question: 2

**After Oracle Grid Infrastructure has been installed, you should take a few moments to verify the installation. Which two actions would be useful in verifying the installation?**

- A. Run the crsctl status resource -t command to confirm that all necessary cluster resources are online.
- B. Use the operating system utilities to verify that your SCAN addresses are being properly resolved.
- C. Start Oracle Enterprise Manager and check all monitored targets.
- D. Run the cluvfy comp nodecon -n all -verbose command to verify the entire Grid Infrastructure installation.

Answer: DA

## Question: 3

**Which two network addresses are required to be static, non-dhcp addresses when using the Grid Naming?**

- A. GNS VIP Address
- B. SCAN VIP Address
- C. Node VIP Address
- D. Node Public Address

E. Node Private Address

Answer: AD

Question: 4

**You are in the planning stages for upgrading your Oracle RAC database from Oracle Database 10g Release 2 to Oracle Database 11g Release 2 to run under the Oracle Grid Infrastructure. You decide to use an administrator-managed configuration because the cluster is fairly small. Which statement is correct about this configuration?**

- A. A parent pool of the GENERIC server pool will be used.
- B. You must define a new server pool called MANUAL.
- C. A subpool of the GENERIC server pool will be used.
- D. A subpool of the FREE server pool will be used.

Answer: A

Question: 5

**The Instance Initialization parameters are set to: D8\_CREATE\_FILE\_DEST = +DATA DB\_CREATE\_ONLINE\_LOG\_DEST\_1 = +LOGS DB\_CREATE\_ONLINE\_LOG\_DEST\_2 = +FRA The SQL\* Plus command ALTER DATABASE ADD LOGFILE; will create:**

- A. a new log file in the +DATA disk group, or a log file in the + FRA disk group, if +DATA is not available
- B. a new log file in the +DATA disk group and a log file in the + FRA disk group
- C. a new log file in the +LOGS disk group and a log file in the + FRA disk group
- D. a new log file in the +LOGS disk group, or a log file in the +FRA disk group, if +LOGS is not available
- E. a new log file in the +DATA disk group, a log file in the +LOGS disk group, and a log file in the +FRA disk group
- F. a new log file in the +LOGS disk group, or a log file in the +FRA disk group, if +LOGS is not available

Answer: E

Question: 6

**Which three statements define a cluster?**

- A. is a group of independent, but interconnected computers that act as a single system
- B. can be deployed to increase availability and performance
- C. can be deployed to balance a dynamically changing workload
- D. should appear to an application as multiple servers

Answer: ABC

## Question: 7

**You want to create an ACFS on an ADVM volume using a shell script and the appropriate command-line utilities. These are the requirements: 1. The dynamic volume file must use space in the VOLFILE disk group with a size of 500 M and be called prodvol. 2. The mount point called /acfs already exists. Which four steps must be performed to achieve this?**

- A. As the Grid Infrastructure owner, run `mount -t acfs /dev/asm/prodvol-417 /acfs` to mount the file system.
- B. As the Grid Infrastructure owner, run `asmcmd volinfo -d VOLFILE prodvol` to determine the volume information.
- C. As the Grid Infrastructure owner, run `asmcmd voicreate -d VOLFILE -s 500M prodvol` to create the volume file.
- D. As the Grid Infrastructure owner, run `mkfs -t acfs /dev/asm/prodvol -417` to create the file system.
- E. As root, run `mount -t acfs /dev/asm/prodvol -417 /acfs` to mount the file system.
- F. As root, run `mkfs -t acfs /dev/asm/prodvol -417` to create the file system.

Answer: A, B, C, E

## Question: 8

**Some new non-ASM shared storage has been made available by the storage administrator and the Oracle Grid Infrastructure Administrator decides to move the voting disks, which do not reside in ASM, to this new non-ASM location. How can this be done?**

- A. by running `crsctl add css votedisk <path_to_new_location>` followed by `crsctl delete css votedisk <path_to_old_location>`
- B. by running `crsctl replace css votedisk <path_to_old_location/path_to_new_location>`

- C. by running `srvctl replace css votedisk <path_to_old_location,path_to_new_location>`
- D. by running `srvctl add css votedisk <path_to_new_location>` followed by `srvctl delete css votedisk <path_to_old_location>`

Answer: C

Question: 9

**Which three statements are true about using RMAN with ASM?**

- A. RMAN is the only supported method to back up database files stored in ASM.
- B. RMAN is the only supported method to back up ACFS files.
- C. RMAN can use ASM storage for backups.
- D. RMAN cannot use ASM storage for backups.
- E. Using RMAN, database files can be migrated to ASM from a file system.
- F. Using RMAN, database files cannot be moved from ASM to a file system

Answer: ACE

Question: 10

**Which two statements are true about ACFS snapshots?**

- A. They can be created for ACFS file systems only if the ASM disk group hosting the ADVM volume file used by the file system has free space available.
- B. They can be created for ACFS file systems only if the ADVM volume file used by the file system has free space available.
- C. They can be created only if the ASM disk group hosting the ADVM volume used by the file system has no other ASM files contained in the disk group.
- D. They can be created when ACFS is used both on clusters and on stand-alone servers.
- E. They are accessible only on the cluster node that was used when creating the snapshot.

Answer: AB

Question: 11

You. « luster Is subject to a service-level agreement that allows for little scheduled down time You want to use patching and maintenance methods that permit the Oracle Grid Infrastructure and Oracle RAC Databases to be available as much as possible. Which two techniques will work some or all of the time to provide you with minimum down time?

- A. rolling upgradeable and in place patch sets
- B. idling upgradeable and out of place patch bundles
- C. rolling upgradeable and out of place patch sets
- D. rolling upgradeable and in place patch bundles
- E. rolling upgradeable and out of place one-off patches

Answer: de

## Get Full Version of Exam 1Z0-058 PDF Q&A

techeXams presents authentic, genuine and valid study material, which promise 100% success in very first attempt. To take optimal results for 1Z0-058 exam, you need to buy full version of 1Z0-058 question and answer. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. So come join us and quench your thirst for knowledge.
