Question: 1.

You are installing a new NetBackup client that must communicate across a firewall to its master/media server. Which NetBackup 5.0 process helps reduce the number of ports that must be opened in the firewall?

- A. inetd
- B. bpcd
- C. vnetd
- D. firewalld

Answer: C

Question: 2.

How many different backup image retention selections are available?

- A. 9
- B. 10
- C. 24
- D. 25
- E. 99

Answer: D

Question: 3.

Which three capabilities are available in the NetBackup 5.0 calendar-based scheduler? (Choose three.)

- A. run a user backup job
- B. run a NBU catalog backup
- C. exclude a backup job on a specific date
- D. run a backup job on the fourth Friday of the month
- E. run a backup job on the last calendar day of the month

Answer: CDE

Question: 4.

You want to restrict NetBackup administrative access to users logged into a particular media server. How do you accomplish this?

- A. add the media server name to the server list, and not the media server list
- B. add the media server name to the media server list, and not the server list
- C. add the media server name to both the server list and the media server list
- D. remove the media server name from both the server list and the media server list

Answer: B

Question: 5.

How do you specify an exclude list for a single policy or schedule?

- A. Client properties: UNIX clients or Windows clients: Exclude List Select the policy or schedule
- B. Client properties: UNIX clients or Windows clients: Exclude list area type in the name of the policy or schedule before the exclude list
- C. Client properties: UNIX clients or Windows clients: Exclude List Exceptions to the Exclude List area
- D. Client properties: UNIX clients or Windows clients: Include List Exceptions to the Exclude List area

Answer: B

Question: 6.

NetBackup is not able to communicate with a tape device after you have configured it. What do you verify?

- A. NetBackup is running as root.
- B. Media Manager has been installed.
- C. The operating system has inetd running.
- D. The operating system has mapped the logical device to the physical device.

Answer: D

Question: 7.

Which two ways can the UNIX client named clientA be configured to have the NetBackup master server only back up clientA over its backup LAN (which is called clientA-bckup)? (Choose two.)

- A. REQUIRED_INTERFACE = clientA-bckup
- B. NETBACKUP_INTERFACE = clientA-bckup
- C. Universal Settings > NetBackup Interface > clientA-bckup
- D. Universal Settings > Required Network Interface > clientA-bckup

Answer: AD

Question: 8.

Which two criteria can be used to expire physical media? (Choose two.)

- A. date
- B. media full
- C. number of mounts
- D. media moved to a new server
- E. change the backup retention level

Answer: AC

Question: 9.

Given the following scenario about a policy with a single client: Allow Multiple Data Streams is enabled. ALL_LOCAL_DRIVES is specified. Three tape drives are available in the Storage Unit. Max Jobs Per Client is set to 2. The client specified has 5 local file systems with no exclude list. How many backup jobs will be "Active" (not queued) after the policy successfully initiates?

- A. 1
- B. 2
- C. 3

D. 5

Answer: B

Question: 10.

Which three commands can help resolve NetBackup network problems? (Choose three.)

- A. ping
- B. bpverify
- C. nslookup
- D. nbcIntcmd -ip
- E. bpcIntcmd -hn

Answer: ACE

Question: 11.

You are troubleshooting a robot or drive error and require additional Media Manager logs. Which two debug directories can you create for robot or drive error troubleshooting? (Choose two.)

- A. Itid
- B. bpcd
- C. reqlib
- D. bpdm

Answer: AC

Question: 12.

Which three catalogs are contained only on the master server? (Choose three.)

- A. Class
- B. Jobs
- C. Devices
- D. Image

Answer: ABD

Question: 13.

Which script do you execute to uninstall a Maintenance Pack from a UNIX master server?

- A. Vrts_pack.uninstall
- B. Vrts_patch.uninstall
- C. Vrts_pack.install and select Uninstall
- D. Vrts_patch.install and select Uninstall

Answer: A

Question: 14.

The latest Maintenance Pack has just been applied to your Microsoft Windows master server. In which directory under <install dir>\ do you validate that it was installed successfully?

- A. var
- B. pack
- C. patch
- D. netbackup

Answer: C

Question: 15.

Which command is used to verify that NetBackup and Media Manager processes are running?

- A. bpps
- B. bpdbm
- C. bpbackup
- D. bpprocess

Answer: A

Question: 16.

After installing the master server, which three daemons should be running if the installation was successful? (Choose three.)

- A. bprd
- B. bptm
- C. bpjobd
- D. bpdbrm
- E. bpdm

Answer: ACD

Question: 17.

You have just installed a NetBackup 5.0 master server. Which three NetBackup processes are running if the installation was successful? (Choose three.)

- A. bprd
- B. bptm
- C. bpjobd
- D. bpdbrm
- E. bpdm

Answer: ACD

Question: 18.

What are three recommendations for NetBackup media server installation? (Choose three.)

- A. You should remove any other vendor backup software.
- B. At least one tape drive should be available for backup operations.
- C. All NetBackup servers should recognize and be recognized by their client systems.

D. You should make certain that you have a server of a supported hardware type running a supported version of an OS.

Answer: ACD

Question: 19.

Which two actions do you perform prior to upgrading a media server from NetBackup 4.5 to 5.0? (Choose two.)

- A. stop all bpsched processes
- B. delete the existing bp.conf file
- C. stop all of the NetBackup and Media Manager daemons
- D. save copies of customized NetBackup scripts

Answer: CD
