Question: 1

The Solaris 10 OS supports a number of password-related security controls, including minimum password length, password aging, password history, password complexity rules, and password dictionary lookup.

Place each password control item next to its appropriate description.

Password Control Description	Password Control Item
Prevents a user from selecting a commonly used word as a password	Password length
Determines the minimum acceptable length of a user's password	Password aging
Determines the minimum character class requirements for a user's password must be changed	Password history
Determines how often a user's password must be changed	Password complexity
Prevents a user from selecting a previously used password	Password look up

Answer:

Password Control Description

Password Control Item

Password Control Description	Password Control Item
Passw	ngth
Pass	ging
Pass	story
Pass	plexity
Passwo	ks up

Question: 2

The company security policy includes capturing all environment variables. An auditor complains about this for a central place to

actions. This is done by the security administrator on the host. He asks the security administrator to

- A. Configure auditd to capture all environment variables.
- B. Configure auditd to capture all environment variables.
- C. Configure auditd to capture all environment variables.
- D. Configure auditd to capture all environment variables.

Answer: C

Question: 3

Which two tasks does the `passwd` command perform? (Choose two.)

- A. issues service tickets
- B. authenticates users
- C. issues tick-grants
- D. validates passwords
- E. provides private keys

Answer: A, C

Question: 4

Given:

`jupiter$md5,round`

What is the character

- A. User jupiter uses the password \$kCF48vFPsHDjIK
- B. User jupiter uses the encrypted password 2amxesSj5, and with the salt 2amXessj5, and with the encrypted password
- C. User Jupiter uses the password 2amxesSj5, and with the encrypted password
- D. User jupiter uses the password 2amxesSj5, and with the salt, and with the encrypted password

10:::

the encrypted password

2amxesSj5, and with

alt 2amXessj5, and

o salt, and with the

Answer: C

Question: 5

A security administrator has files on a number of

operating system the Solaris

The administrator wants to create a fingerprint of the files. Which command should the administrator use?

- A. `md5sum`
- B. `digest`
- C. `encrypt`
- D. `elfsign`
- E. `cryptoadm`

310-303 Demo Exam

Answer: B

Question: 6

You are configuring a Solaris system after you have installed the minimum Solaris OS. You need to set the appropriate web server privileges. Which web server daemon will be used by default with the company's security policy? The web server will have the same privileges as the web service will run with?

- A. The PRIV_DEFAULT
- B. The defaultpriv
- C. The privileges profile
- D. The privs property

After you have added the default, the web server will be set. To comply with the security policy, the web service will run with the same privileges as the web service will run with?

Answer: C

Question: 7

After a recent audit of a Solaris system, you find that the system is not secure. Which of the following actions will minimize the system's attack surface?

- A. Back up the system
- B. Remove any unnecessary services
- C. Install the SUNV
- D. Remove any unnecessary packages
- E. Confirm with the administrator

Solaris system before starting to minimize the system's attack surface.

minimization.

Answer: A, E

Question: 8

You are troubleshooting a Solaris system. The exhibit shows a complaint about a service not functioning. This application is located in the /etc directory.

...ive a ... not function.

310-303 Demo Exam

```
# PS -fp 734
      UID  PID  PPID  C  STIME  TTY  TIME  CMD
```

What setting prevents

- A. The system might be compromised
- B. The server is not secure
- C. The server should be secure
- D. Some of the libraries are not in the environment.

server's chroot

Answer: B

Question: 9

One of the operators is assigned to
activate and configure the system
remembered in the system.

- A. /etc/shadow
- B. /etc/pam.conf
- C. /etc/default/passwd
- D. /etc/security/passwd

group and tasked to
passwords should be
previously configured?

Question:

Within the context of the Solaris 10 Basic Audit and Reporting Framework, what is the scope of the
Basic Audit and Reporting Framework?
Given the rule file:

```
/home/bert/docs *.og[dt] CHECK
```

Which two statements are valid? (Choose two.)

- A. All files on the system will be checked.
- B. The last modification time of all checked files will not be checked.
- C. Keywords such as CHECK and IGNORE can NOT be used in a rule file.
- D. Only files with extension .ogt and .ogd in the directory /home/bert/docs will be checked.

E. All files on the system will be checked, except for files with extensions .ogt and .ogd in the directory /home/bert/docs.

Answer: B, D

Question: 11

Solaris Auditing supports which two of the following actions? (Choose two.)

- A. file access by selected users
- B. access to selected files
- C. selected users' password changes
- D. password changes by selected users

Which two of the following actions are supported by Solaris Auditing? (Choose two.)

Answer: A, C

Question: 12

A security administrator is configuring a file system control policy:

```
$ getfacl prevoy
#file: prevoy # owner: root
#permissions:
-rwxr-xr-x user::prevoy
-rwxr-xr-x group::prevoy
-rwxr-xr-x other::prevoy
#default:group:sysadm
```

Into this directory, the administrator runs the following command:

```
$ ls -ld . secrets drwxr-xr-x 2 secadm 0 Jun 6 16:30
```

Which two actions are supported by the file system control policy?

- A. The sysadm role can create files in the directory.
- B. The sysadm role can delete files in the directory.

Which two of the following actions are supported by the file system control policy?

Which two of the following actions are supported by the file system control policy? (Choose two.)

Which two of the following actions are supported by the file system control policy? (Choose two.)

Which two of the following actions are supported by the file system control policy? (Choose two.)

Which two of the following actions are supported by the file system control policy? (Choose two.)

Answer: A, B
