Question: 1

Match each 3Com Wireless Switch (WX) term with its description.

The diagram consists of three yellow boxes on the left, each labeled "Place Here" followed by a number in parentheses: (1), (2), and (3). To the right of these are three light blue boxes with dashed borders containing descriptions. At the bottom are three light pink boxes with dashed borders containing the terms: SSID (a), Service Set (b), and Service Profile (c).

Place Here (1)

Place Here (2)

Place Here (3)

SSID (a)

Service Set (b)

Service Profile (c)

A discrete configuration that is a logical grouping of security, radio frequency (RF) and network functions

Where you set up and manage WX configuration parameters, i.e., SSID type, fall through authorization, and encryption

Is a unique name shared among all computers to identify a logical grouping of security, radio frequency (RF) and network functions

Answer: 1-c, 2-a, 3-b

Question: 2

Which functionality is transferred from 3Com Access Points (APs) to the 3Com Wireless LAN Controller/Switch, creating Fit APs or Managed Access Points (MAPs) with the 3Com Wireless LAN Mobility System?
