Question: 1

The MoH server Parameter on the left to its description on the right. Not all Parameters apply.

Run Flag	In conjunction with a sound card, allows you to use a live radio broadcast for MoH
Maximum Multicast connections	Enables the number of devices that can be a source of multicast music
Fixed Audio Source Device	Determines the number of devices to which a server can provide a unicast audio stream
Maximum Half Duplex Streams	When set to 'NO' MoH is not provided when set to 'YES' MoH is enabled

Answer:

Question: 2

Which two gateway configuration statements are required, at a minimum, in order to enable Cisco Unified CallManager to control a T1 PRI in an MGCP gateway? (Choose two.)

- A. mgcp
- B. ccm-manager config
- C. pri-group configuration on the controller
- D. mgcp call-agent pointing to tuft server
- E. isdn l3-backhaul ccm-manager on the serial interface
- F. config-server address pointing to tftp server

Answer: B, F

Question: 3

Which of these is the best practice to employ when using certificates between a browser and the Cisco Unified CallManager 5.0 server?

- A. Accept the certificate when the security alert pop-up window appears.
- B. Use SSH exclusively to verify the thumbprint of the certificate and then send the certificate to all web browser users that require access to the server.

- C. Use either SSH or CLI to view the thumbprint of the certificate and then communicate the information to all web browser users so they already have it available when they receive the security alert.
- D. Note the thumbprint of the Cisco Unified CallManager certificates after installation and then communicate the information to all web browser users so they have it available when they receive the security alert.
- E. Install thumbprint readers on the devices that need to connect to the Cisco Unified CallManager servers via HTTPS.

Answer: D

Question: 4

Which two Cisco Unified CallManager tasks are required to route calls from Cisco Unified CallManager to the PSTN via an H.323 gateway? (Choose two.)

- A. add a gatekeeper from the Device menu
- B. add an H.323 gateway from the Device menu
- C. configure the voice endpoints in Cisco Unified CallManager
- D. configure the signaling protocol used on the voice circuit
- E. add PSIN route patterns pointing to the gateway
- F. configure the IP phones with an external phone number mask

Answer: B, E

Question: 5

Which of the following actions will prevent devices from being able to initiate conferences?

- A. Exclude the conference media resource Partitions from the CSS.
- B. Exclude the conference media resources from all MRGs.
- C. Place all conference media resources in MRGs and exclude these MRG5 from the MRGL.
- D. Remove the default MRGL from the device pool.

Answer: C

Question: 6

You have configured SRST at a remote site on an MGCP gateway. During testing, you find that IP phones are not registering with the SRST router when the IP WAN fails. Which three potential problems need to be investigated? (Choose three.)

- A. No dial-peers have been added to the SRST router.
- B. No SRST reference address is included in the device pool.
- C. The proper service command has not been added to the SRST router.
- D. The max-ephones command is Missing in the SRST router.
- E. The max-dn command is Missing in the SRST router.
- F. The ccm-manager fallback-mgcp command is Missing in the SRST router.

Answer: B, D, E
