## Question: 1

**A Cisco Unified CM cluster is configured for LDAP Authentication. Which two statements regarding this integration are correct? (Choose two.)**

- A. User passwords are configured and managed in LDAP.
- B. User passwords are replicated to Cisco Unified Communications Manager database.
- C. Users and their personal organization data must be configured in LDAP and are replicated to Cisco Unified Communications Manager database.
- D. User authentication fails if the LDAP directory is not available.
- E. If LDAP synchronization is also configured, user authentication will be performed against the Cisco Unified Communications Manager database if the LDAP directory is not available.

Answer: A, D

## Question: 2

**Which three steps need to be performed on a third party SIP phone device when adding it to Cisco Unified Communications Manager 6.0? (Choose three.)**

- A. Select XML as the method to send the third party SIP phone its configuration file.
- B. Add the MAC address of the Cisco Unified Communications Manager server to the SIP phone configuration.
- C. Set the directory numbers to match the directory numbers configured in Cisco Unified Communications Manager.
- D. Set the digest user ID in the SIP device to match the digest user ID in Cisco Unified Communications Manager.
- E. Set the TLS user ID and password in the SIP phone to match the TLS user ID and password in Cisco Unified Communications Manager.
- F. Set the proxy address in the SIP phone to match the IP address or fully qualified domain name of Cisco Unified Communications Manager.

Answer: C, E, F

## Question: 3

**Which two gateway configuration statements are required in order to enable Cisco Unified Communications Manager to control a T1 PRI in an MGCP gateway? (Choose two.)**

- A. mgcp
- B. ccm-manager config
- C. pri-group configuration on the controller
- D. mgcp call-agent pointing to tftp server
- E. isdn I3-backhaul ccm-manager on the serial interface

F. ccm-manager config server {TFTP ip\_address}

Answer: B, F

Question: 4

Click and drag the XML application service information field name on the left to its correct description on the right

- Service Name
- ASCII Service Name
- Service Description
- Service URL

- The server where the IP phone services application is located.
- The content that the service provides.
- The service as it will be displayed if the phone cannot display Unicode
- The service as it will be displayed on the menu of available services in the Cisco Unified IP Phone User Options application.

Answer:

Click and drag the XML application service information field name on the left to its correct description on the right

- Service Name
- ASCII Service Name
- Service Description
- Service URL

- Service URL
- Service Description
- ASCII Service Name
- Service Name

Question: 5

**If a service is currently deactivated, how can the service be reactivated from the Cisco Unified Communications Manager Serviceability Control Center page?**

- A. By clicking on the radio button to the left of the service on the Control Center page
- B. By selecting Cisco Unified CM Serviceability > Service Activation and then clicking on the radio button to the left of the service to activate it
- C. By selecting Tools > Service Activation, selecting the correct server, and clicking on the radio button to the left of the service to activate it
- D. By selecting Cisco Unified CM Serviceability > Tools, clicking on the radio button to the left of the service that needs to be activated, and then returning to the Control Center to activate the service

Answer: C

Question: 6

**Which two of these media resources are available only in hardware? (Choose two.)**

- A. transcoding
- B. audio conferencing
- C. MTP
- D. annunciator
- E. MOH
- F. voice termination

Answer: A, F

Question: 7

Click and drag the MoH server parameter on the left to its description on the right. Not all parameters apply.

Run Flag	in conjunction with a sound card, allows you to use a live radio broadcast for MoH
MoH Enabled	enables the number of devices that can be a source of multicast music
Enable Base Multicast	determines the number of devices to which a server can provide a unicast audio stream
Maximum Multicast Connections	when set to 'NO', MoH is not provided, when set to 'YES' MoH is enabled
Fixed Audio Source Device	
Maximum Half Duplex Streams	

Answer:

Click and drag the MoH server parameter on the left to its description on the right. Not all parameters apply.

Run Flag	Fixed Audio Source Device
MoH Enabled	Maximum Multicast Connections
Enable Base Multicast	Maximum Half Duplex Streams
Maximum Multicast Connections	Run Flag
Fixed Audio Source Device	
Maximum Half Duplex Streams	

Question: 8

**Which three steps are necessary in order to configure DHCP for phone support using the GUI in Cisco Unified Communications Manager 6.0? (Choose three.)**

- A. Add the DHCP server IP address to the device pool
- B. Activate DHCP Monitor Service
- C. Add and configure the DHCP server
- D. Start the application on an external server
- E. Configure the DHCP subnet
- F. Download the DHCP server application from the plug-in page

Answer: B, C, E

## Get Full Version of Exam 642-446 PDF Q&A

techeXams presents authentic, genuine and valid study material, which promise 100% success in very first attempt. To take optimal results for 642-446 exam, you need to buy full version of 642-446 question and answer. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. So come join us and quench your thirst for knowledge.
