Question: 1

The NAS is configured to autogenerate an IP address pool of 30 subnets with a netmask of /30, beginning at address 192.166.10.0. Which IP address is leased to the end-user host on the second subnet?

- A. 192.166.10.4
- B. 192.166.10.5
- C. 192.166.10.6
- D. 192.166.10.7

Answer: C

Question: 2

Which default administrator group has delete permissions?

- A. Admin
- B. Help-desk
- C. Add-edit
- D. Full-control

Answer: D

Question: 3

What is the result when the condition statement in a Cisco NAA check for required software evaluates to false on a client machine?

- A. The required software is automatically downloaded to the user device.
- B. The required software is made available after the user is quarantined.
- C. The user is put in the unauthenticated role and the software is considered missing.
- D. The user is placed in the temporary role and the software is made available.

Answer: B

Question: 4

Which three components comprise a Cisco NAC Appliance solution? (Choose three.)

- A. A NAC-enabled Cisco router
- B. A Linux server for in-band or out-of-band network admission control
- C. A Linux server for centralized management of network admission servers

- D. A Cisco router to provide VPN services
- E. A read-only client operating on an endpoint device F – A NAC-enabled Cisco switch

Answer: B, C, E

Question: 5

Drag the default username from the left to the correct description on the right.

normal role	assigned to this role after vulnerabilities are found in a network scan
blocked role	assigned to this role when Cisco NAA end-user policy requirements are not met
authenticated role	assigned to this role after a successful login
quarantine role	
remediation role	
temporary role	

Answer:

normal role	quarantine role
blocked role	temporary role
authenticated role	normal role
quarantine role	
remediation role	
temporary role	

Question: 6

Drag each feature of a Cisco NAC Appliance solution from the left to its correct benefit on the right.

vulnerability assessment	has a web-based management console that can manage several servers
authentication integration	provides access to OS patches and updates, virus and spam filters, and endpoint security
traffic-filtering policies	scans for specific endpoint devices and roles, and adjusts for required remediation
centralized management	supports Kerberos, LDAP, RADIUS, Active Directory, S/Ident
remediation and repair	supports role-based policies
adaptable levels of enforcement	supports scanning of network-based operating systems and non-PC networked devices

Answer:

vulnerability assessment	centralized management
authentication integration	remediation and repair
traffic-filtering policies	adaptable levels of enforcement
centralized management	authentication integration
remediation and repair	traffic-filtering policies
adaptable levels of enforcement	vulnerability assessment

Question: 7

When configuring the Cisco NAM to implement Cisco NAA requirement checking on client machines, what is the next step after configuring checks and rules?

- A. Retrieve updates
- B. Require the use of the Cisco NAA
- C. Configure session timeout and traffic policies
- D. Map rules to requirement
- E. Configure requirements

Answer: E
