Question: 1

Users report that legitimate e-mail messages are being delivered to their Microsoft Office Outlook Junk E-mail folders . You confirm that the e-mail addresses of the message senders were on the Outlook Safe Senders List . You need to allow user -defined S afe Senders L ists to be used during the Exchange Edge Transport server message delivery . What should you do?

- A. On the Mailbox server content filter configuration, enable Outlook E-mail Postmark validation.
- B. On the Edge Transport server content filter configuration, enable authenticated message bypass.
- C. Enable anti-spam updates on the Edge Transport server.
- D. Run the Update-SafeList cmdlet for each users mailbox on the Mailbox server.

Answer: D

Question: 2

Your companys Microsoft ActiveSync policy is configured to require inactive user s to provide their password every 10 minutes. A company executive request s that her mobile device be exempt from the inactivity timer. You need to exempt the executives mobile device from the timeout policy while maintaining the other corporate policy settings. What should you do?

- A. Remove the corporate ActiveSync policy from the executives mailbox.
- B. Create a new ActiveSync policy that has the required settings, and apply it to the executives mailbox.
- C. Change the password setting on the executives mobile device to override the ActiveSync policy.
- D. Reconfigure the executives mobile device for ActiveSync, and do not apply the corporate ActiveSync policy.

Answer: B

Question: 3

You are preparing to configure e-mail retention on three managed custom folders for all mailboxes on an Exchange Server 2007 computer named Exch1.

You perform the following actions. Create three managed custom folders. Create managed content settings for each folder, and configure the required retention settings. Create a new managed folder mailbox policy named MailRet . Add each managed custom folder to the MailRet policy.

Configure the managed folder assistant for Exch1.

You need to finish configuring the messaging records management (MRM) retention settings so that the three folders are available for the mailboxes on Exch1.

What should you do?

- A. For each mailbox on Exch1, select the Enable retention hold for items in this mailbox check box.
- B. For each mailbox on Exch1, add the MailRet policy.
- C. Add managed content settings to the three managed custom folders.
- D. Create a new managed folder mailbox policy for each of the three managed custom folders.

Answer: B

Question: 4

You need to configure a public folder to replicate on only Saturdays and Sundays. You also need to ensure that posts will be denied after the folders size reaches 500 MB.

Which cmdlet should you run for the public folder?

- A. Set- PublicFolder - StorageQuota 500MB - ReplicationSchedule "Saturday.12:00 AM-Sunday.11:59 PM"
- B. Set- PublicFolder - PostStorageQuota 500MB - ReplicationSchedule "Saturday.12:00 AM-Sunday.11:59 PM"
- C. Set- PublicFolder - MaxItemSize 500MB - ReplicationSchedule "Saturday.12:00 AM-Sunday.11:59 PM"
- D. Set- PublicFolder - PostStorageQuota 500MB - UseDatabaseRetentionDefaults : \$true

Answer: B

Question: 5

Your Exchange Server 2007 organization contains two load balanced Client Access servers . Outlook Anywhere users on the corporate network have access to availability information.

You need to allow access to availability information for users outside the corporate network who connect by using Outlook Anywhere.

What should you do?

- A. Run the Set-CASMailbox cmdlet with the appropriate parameters on each of the Client Access servers.
- B. Add a replica of the Exchange organizations Free/Busy public folder to at least one of the Mailbox servers in the same site as the Client Access servers.
- C. Add the Full Details read permission to each users calendar properties by using the Microsoft Office Outlook client.
- D. Set the external URL by running the Set-WebServicesVirtualDirectory cmdlet on each of the Client Access servers.

Answer: D

Question: 6

Your company has a separate business unit named Northwind Traders.

All Northwind Traders employees have mailboxes on your companys Exchange Server 2007 computers. All Northwind Traders employee mailboxes have been assigned northwindtraders.com e-mail addresses. The e-mail address policy is configured as shown in the following exhibit . (Click the Exhibit button.)

The Northwind Traders distribution groups have not been assigned northwindtraders.com e-mail addresses.

You need to use an e-mail address policy to assign all of the Northwind Traders distribution groups an e-mail address from the northwindtraders.com domain. What should you do?

Exhibit:

```
Schema : Microsoft.Exchange.Data.Directory.SystemCon
figuration.EmailAddressPolicySchema
Identity : Northwind Traders
Name : Northwind Traders
RecipientFilter : (&Alias -ne $null -and Company -eq 'Northwin
d Traders')
RecipientFilterType : Precanned
IncludedRecipients : AllRecipients
RecipientFilterApplied : True
Department : (<)
Company : (<Northwind Traders>)
StateOrProvince : (<)
EnabledPrimarySMTPAddressTemplate : %n@northwindtraders.com

[PS] C:\>_
```

- A. Run the Set-EmailAddressPolicy cmdlet with the RecipientFilter parameter to add each of the distribution groups to the existing e-mail address policy. Run the Update-EmailAddressPolicy cmdlet with appropriate parameters.

- B. Run the Set-EmailAddressPolicy cmdlet with the IncludedRecipients parameter to add each of the distribution groups to the existing e-mail address policy. Run the Update-EmailAddressPolicy cmdlet with the appropriate parameters.
- C. Assign a unique custom attribute value to each Northwind Traders distribution group. Modify the existing policy by adding the assigned custom attribute to the conditions list by using the Exchange Management Console.
- D. Assign a unique custom attribute value to each Northwind Traders distribution group. Add an additional e-mail address policy that filters for the assigned custom attribute.

Answer: D
