## Question: 1

You create a PerformancePoint Add-in for Excel report. You create a matrix for the report. You add a dimension named Products to the column property of the matrix. One of the columns in the report displays the Product Id property of the Products dimension. You need to display the Product Name property with the Product Id property in the column. What should you do?

- A. Set the Member Properties property of the Products dimension to Product Name.
- B. Set the Member Properties property of the Products dimension to Product Name, Product Id.
- C. Set the Show Banded Columns property of the matrix to True, and select the All Member check box for the Products dimension.
- D. Set the Show Banded Columns property of the matrix to True, and create two separate dimension property filters for the Product Name property and the Product Id property.

Answer: B

## Question: 2

You create a PerformancePoint Add-in for Excel report. The report displays sales data. You need to change the background color of the cells that contain sales data. What should you do?

- A. Modify the Output cell style.
- B. Modify the Check Cell cell style.
- C. Modify the Data Cell C PerformancePoint cell style.
- D. Modify the Data Entry Cell C PerformancePoint cell style.

Answer: C

## Question: 3

You create a PerformancePoint Add-in for Excel report. Your model has a dimension named Products. The Products dimension contains two member sets named Color and ProductCategory. You add a matrix to the report. The matrix displays the number of products in the ProductCategory member set. You need to ensure that the matrix displays the number of products in the ProductCategory member set only if the Color member has a value of either Red or Blue. What should you do?

- A. Add the Color member to the matrix row. Select the members Red, Blue.
- B. Add the Color member to the matrix column. Select the members Red, Blue.
- C. Add the Color member to the matrix filter. Set the Default Selected Members property of the matrix filter to Red, Blue.
- D. Add ProductCategory to the matrix filter. Set the Default Selected Members property of the matrix filter to Red, Blue.

Answer: C

Question: 4

**You create a PerformancePoint Add-in for Excel report. The report retrieves data from a hierarchy. The hierarchy is located on the row axis and contains data that is grouped into different levels. You need to ensure that the data grouping in each level is easily visible. What should you do?**

- A. Set the Show banded rows property to True.
- B. Set the Show banded columns property to True.
- C. Set the Show column headers property to False.
- D. Set the Auto-indent row members property to True.

Answer: D

Question: 5

**You create a PerformancePoint Add-in for Excel report. You publish the report as a form. Users can modify the values that are stored in the non-leaf members. You need to ensure that any changes made to non-leaf member values are also propagated to the leaf-member values. Your solution must maintain the proportion between the leaf-member values. What should you do?**

- A. Set the Spreading type property to Ratio.
- B. Set the Spreading type property to Evenly.
- C. Set the Allow drill through property to False.
- D. Set the Assignment submit all property to True.

Answer: A

Question: 6

You create a PerformancePoint Add-in for Excel report. You add a three-level hierarchy to the report. You select ten top-level members from the hierarchy. You need to ensure that the report displays only the leaf members of the ten selected members. What should you do?

- A. On the shortcut menu, click Add Lowest for each selected member.
- B. On the shortcut menu, click Add Children for each selected member.
- C. On the shortcut menu, click Add Siblings for each selected member.
- D. On the shortcut menu, click Add Descendents for each selected member.

Answer: A
