## Question: 1

You work as a desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. The TecheXams.ws network contains both desktop and laptop workstations. You are responsible for managing a desktop workstation named TECHEXAMS-WS620. TECHEXAMS-WS620 is configured to run Windows Vista. You install Windows 7 on a new partition on TECHEXAMS-WS620 but you want Windows Vista to be booted by default on TECHEXAMS-WS620 and not Windows 7. What should you do?

- A. You should consider running Bcdedit.exe and specifying the /default parameter.
- B. You should consider creating a boot.ini file in the root of the Windows 7 partition.
- C. You should consider running Bcdedit.exe and specifying the /bootems parameter.
- D. You should consider creating a boot.ini file in the root of the Windows Vista partition.

Answer: A

## Question: 2

You work as a desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. You are responsible for maintaining TecheXams.ws's Windows 7 workstations. You want to configure all Windows 7 workstations to produce a new Security ID (SID) as well as a Welcome screen every time the workstation is booted. What should you do?

- A. You should consider running Msconfig.exe and select Diagnostic startup on all Windows 7 workstations.
- B. You should consider running Sysprep.exe /audit /generalize on all Windows 7 workstations.
- C. You should consider running Msconfig.exe and select Selective startup on all Windows 7 workstations.
- D. You should consider running Sysprep.exe /oobe /generalize on all Windows 7 workstations.

Answer: D

## Question: 3

You work as a desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. TecheXams.ws purchases a new client computer named TECHEXAMS-WS680. You have been instructed to

**perform an automated installation of Microsoft Windows 7 on TECHEXAMS-WS680 using the Microsoft Windows 7 DVD. What should you do?**

- A. You should consider creating an answer file named oobe.xml and copying it to a network share.
- B. You should consider creating an answer file named winnt.sif and copying it to a removable drive.
- C. You should consider creating an answer file named sysprep.inf and copying it to a network share.
- D. You should consider creating an answer file named autounattend.xml and copying it to a removable drive.

Answer: D

Question: 4

**You work as the desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. You need to perform a clean installation of Microsoft Windows 7 Professional on the workstations in the Research department. All workstations in the Research department have identical hardware as listed below:**

- 1.1.2 GHz Dual-Core processor.
- 2.1024 MB of RAM.
- 3.20 GB hard drive.
- 4.DirectX 10 video display card.
- 5.Integrated sound card.

**6.10/100 integrated network adapter.**

**You need to ensure that the workstations able to support Windows 7 and are able to support Windows XP mode. What should you do? (Each correct answer presents part of the solution. Choose two.**

- A. You should upgrade the processor.
- B. You should upgrade the RAM.
- C. You should upgrade the video card.
- D. You should upgrade the hard drive
- E. You should upgrade the network adapter.

Answer: BD

## Question: 5

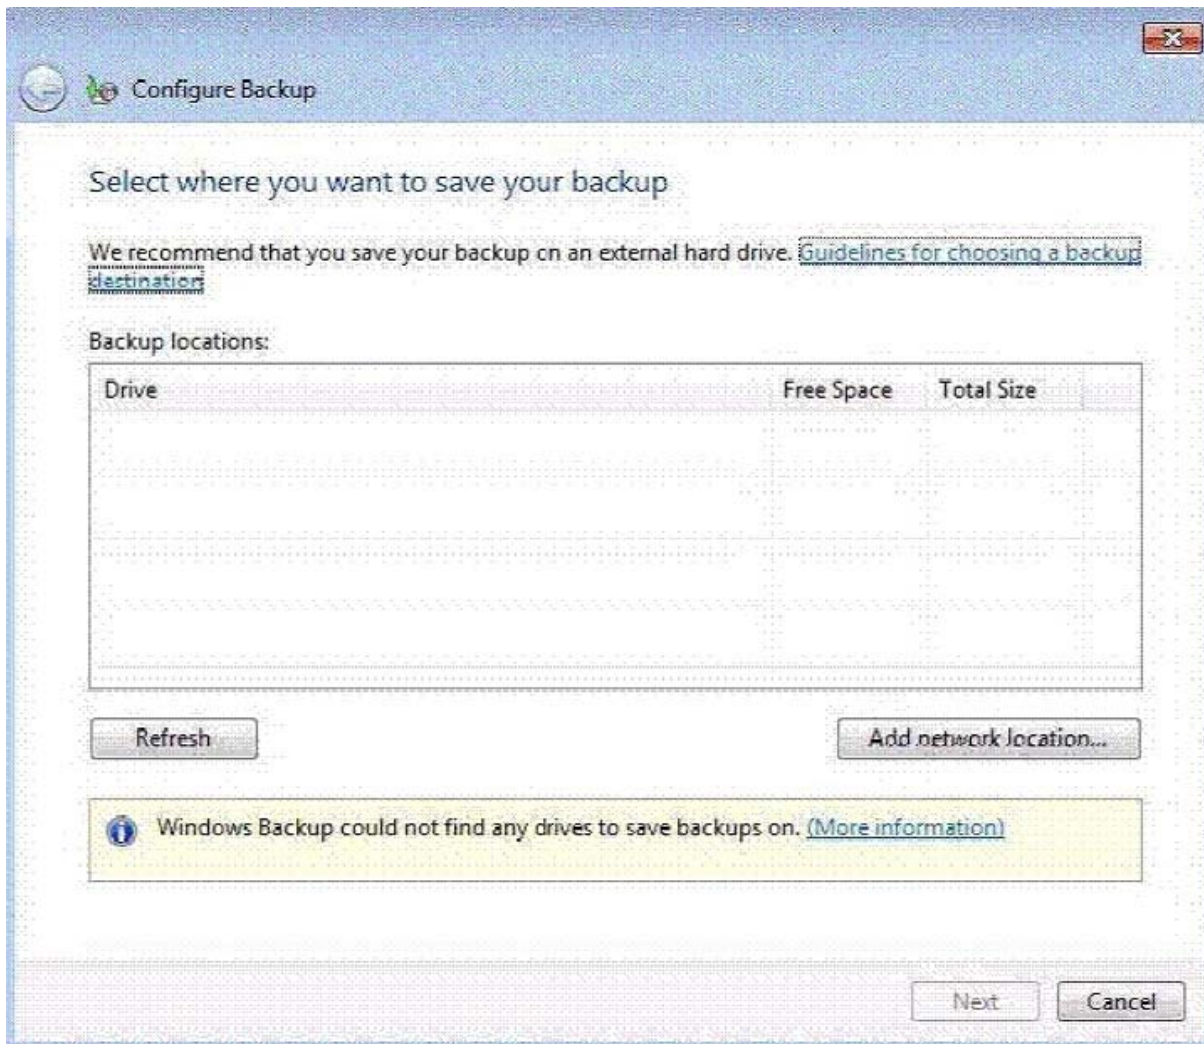

You work as the Desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. The TecheXams.ws management has instructed you to install Microsoft Windows 7 on all the client computers at TecheXams.com. You need to create a Windows 7 image that includes the Office 2007 Microsoft Installer Package (MSI) package for the installation. What should you do?

- A. You should consider installing the MSI package by using the Msiexec command with the /passive switch.
- B. You should consider installing the MSI package by using the Msiexec command with the /package /uninstall switches.
- C. You should consider installing the MSI package by using the Msiexec command with the /package switch.
- D. You should consider installing the MSI package by using the Msiexec command with the /update switch.

Answer: C

## Question: 6

You work as a desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. You are working a Windows 7 workstation named TECHEXAMS-WS680. You want to backup data on TECHEXAMS-WS680. You open the Configure Backup wizard as shown in the exhibit below:

**You to be able to backup the data to a local disk drive. What should you do?**

- A. You should consider adding your user account to the Backup Operators group before running the Configure Backup wizard.
- B. You should consider starting the Volume Shadow Copy Service (VSS) before running the Configure Backup wizard.
- C. You should consider logging on to TECHEXAMS-WS680 as an administrator before running the Configure Backup wizard.
- D. You should consider disconnecting all removable disks from TECHEXAMS-WS680 before running the Configure Backup wizard.

Answer: D

## Question: 7

You work as a desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. All client computers on the TecheXams.ws network run Windows XP Professional with Service Pack 1 (SP1). You have been assigned a client computer named TECHEXAMS-WS270. You want to upgrade TECHEXAMS-WS270 to Windows 7 Professional without needing to install any of your applications. You verify that TECHEXAMS-WS270 meets the system requirements for Windows 7 by installing and running the Windows 7 Upgrade Advisor. What should you do next?

- A. You should consider upgrading TECHEXAMS-WS270 to Microsoft Windows Vista Business, and then upgrade it to Windows 7 Professional.
- B. You should consider installing Service Pack 3 (SP3) on TECHEXAMS-WS270, and then upgrade it to Windows 7 Professional.
- C. You should consider installing and running Windows Easy Transfer on TECHEXAMS-WS270, and then perform a clean installation of Windows 7 Professional.
- D. You should consider installing and running Windows Easy Transfer on TECHEXAMS-WS270, and then upgrade it to Windows 7 Professional.

Answer: A

**Explanation:**

To upgrade from Windows XP Professional to Windows 7 Professional without having to reinstall applications, you would need to upgrade to Windows Vista first.

**Incorrect Answers:**

B: To upgrade from Windows XP Professional to Windows 7 Professional without having to reinstall applications, you would need to upgrade to Windows Vista first and not to Windows XP Professional SP3.

C: Windows Easy Transfer can be used to migrate user data and setting but will not migrate applications. You would thus need to reinstall applications after installing Windows 7 Professional.

D: Windows Easy Transfer can be used to migrate user data but will not allow you to upgrade directly from Windows XP Professional to Windows 7 Professional.

## Question: 8

You work as a desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. The client computers on the TecheXams.ws network run a mix of Windows 2000 Professional with Service Pack 5 (SP5), Windows XP Professional with Service Pack 3 (SP3), Windows Vista Business and Windows Ultimate. You have received instructions to upgrade some of the client computers to Windows 7 Professional. What should you do?

- A. You should consider upgrading the Microsoft Windows 2000 Professional computers to Windows 7 Professional.
- B. You should consider upgrading the Microsoft Windows XP Professional computers to Windows 7 Professional.
- C. You should consider upgrading the Microsoft Windows Vista Business computers to Windows 7 Professional.
- D. You should consider upgrading the Microsoft Windows Vista Ultimate computers to Windows 7 Professional.
- E. You should consider upgrading the Microsoft Windows Vista Business and Microsoft Windows Vista Ultimate computers to Windows 7 Professional.

Answer: C

**Explanation:**

Only Windows Vista Business can be upgraded to Windows 7 Professional.

**Incorrect Answers:**

A, B: Windows 2000 Professional and Windows XP Professional cannot be upgraded directly to Windows 7 Professional. D, E: Windows Vista Ultimate can be upgraded to Windows 7 Ultimate, but cannot be upgraded to Windows 7 Professional.

Question: 9

You work as a desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. You working on a Windows 7 workstation named TECHEXAMS-WS680. You have received instruction to configure Windows Update on TECHEXAMS-WS680. You open Windows Update as shown in the following exhibit: You need to ensure that the Windows Update settings on TECHEXAMS-WS680 can be changed manually. What should you do?

Exhibit:

- A. You should consider changing the Windows Update settings from the local Group Policy on TECHEXAMS-WS680.
- B. You should consider right-clicking Windows Update and choosing Run as administrator on TECHEXAMS-WS680.
- C. You should consider right-clicking the command prompt and choosing Run as administrator to run Wuapp.exe on TECHEXAMS-WS680.
- D. You should consider logging on to TECHEXAMS-WS680 as member of the Administrators group.

Answer: A

Question: 10

**You work as the desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. All client computers on the TecheXams.ws network run Windows XP Professional. You have been**

**instructed to upgrade the Windows XP Professional client computers to Windows 7. However, before you proceed you need to determine if the current applications on the Windows XP Professional computers will run on Windows 7. You want to accomplish this task using the least amount of administrative effort. What should you do?**

- A. You should run the Application Compatibility Toolkit (ACT) 5.5.
- B. You should run Windows Update.
- C. You should run the Windows 7 Upgrade Advisor.
- D. All of above

Answer: A

### Explanation:

Application Compatibility Toolkit (ACT) 5.5 collects information about the applications that are installed on the network computers and provides information about the applications that are incompatible with Windows Vista. Windows Vista Upgrade Adviser can also be used for the same purpose but it requires a massive amount of administrative effort because it needs to be run separately on each computer.

### Question: 11

**You work as a desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. You are responsible for managing a workstation named TECHEXAMS-WS624. TECHEXAMS-WS624 is configured to run Windows Vista and contains an accounting application named accapp.exe. TecheXams.ws purchases a new Windows 7 workstation that will replace TECHEXAMS-624. You need to export the user state as well as the settings of the accapp.exe application so that it can be migrated to the Windows 7 workstation. What should you do?**

- A. You should consider modifying the migapp.xml file on TECHEXAMS-WS624 and then run Scanstate.exe with the /i parameter.
- B. You should consider modifying the miguser.xml file on TECHEXAMS-WS624 and then running Loadstate.exe with the /ui parameter.
- C. You should consider running Scanstate.exe with the /genconfig parameter on TECHEXAMS-WS624

- D. You should consider running Loadstate.exe with the /config parameter on TECHEXAMS-WS624.

Answer: A

Question: 12

You work as a desktop support technician at TecheXams.ws. The TecheXams.ws network consists of a single Active Directory domain named techeXams.ws. You are assigned two workstations named TECHEXAMS-WS625 and TECHEXAMS-WS680. TECHEXAMS-WS625 is configured to run Windows Vista and TECHEXAMS-WS680 is configured to run Windows 7. You receive an instruction to migrate the user files and profiles from TECHEXAMS-WS625 to TECHEXAMS-WS680. To accomplish this you decide to determine the amount space needed to accomplish the migration. What should you do?

- A. You should consider running Scanstate \\computer1\store /nocompress /p on TECHEXAMS-WS680.
- B. You should consider running Scanstate c:\store /nocompress /p on TECHEXAMS-WS625.
- C. You should consider running Loadstate \\computer1\store /nocompress on TECHEXAMS-WS680.
- D. You should consider running Loadstate c:\store /nocompress on TECHEXAMS-WS625.

Answer: B

## Get Full Version of Exam 70-680 PDF Q&A

techeXams presents authentic, genuine and valid study material, which promise 100% success in very first attempt. To take optimal results for 70-680 exam, you need to buy full version of 70-680 question and answer. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. So come join us and quench your thirst for knowledge.
