Thanks for purchasing techXams' Study Guide,

techXams' 920-245 study guide is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this guide. An average of approximately 10 to 20 hours should be spent to study this guide and you will surely pass your exam. It's our guarantee.

Question: 1

An engineer wants to configure the Virtual Router Redundancy Protocol (VRRP) priority for an IP interface on a Port-based VLAN. Which 8600 Command Line Interface (CLI) command should be used?

- A. `config ip vrrp <vrid> priority <prio>`
- B. `config vlan <vid> ip vrrp <vrid> priority <prio>`
- C. `config ethernet <port> ip vrrp <vrid> priority <prio>`
- D. `config ethernet <vid> ip vrrp <vrid> priority <prio>`

Answer: B

Question: 2

You recently reset an Ethernet Routing Switch 5510 using 4.1 code to the factory default settings. You want to upgrade the code for the 5510 but do not have a console cable to do it. Which IP address must you use to perform this task?

- A. 192.168.1.1/24
- B. 192.168.192.168/24
- C. 192.168.10.1/24
- D. 192.168.168.192/24

Answer: B

Question: 3

Company.com wants port mirroring configured on an Ethernet Switch 470-48T. They want port 23 configured as the monitor port to monitor all traffic received and transmitted between a workstation on port 24 (port Y) and a workstation on port 25 (port X). Once you access the "Port Mirroring Configuration" screen using the Console Interface (CI) Menus, which field should you select?

- A. <->Port X or Port Y <->
- B. <->Port X and Port Y <->
- C. ->Port X or Port Y ->
- D. ->Port X and Port Y ->

Answer: B

Question: 4

An engineer configures a single instance of Virtual Router Redundancy Protocol (VRRP) across two Ethernet Routing Switch 8600s. One Ethernet Routing Switch 8600 is configured with a VRRP Priority of 255 and the other is configured with a VRRP Priority of 100. During testing the engineer notices

2

that both Ethernet Routing Switch 8600s are in Master state. What is a possible cause for this?

- A. The Ethernet Routing Switch 8600s are in the same VRRP group with the same VRID.
- B. A critical IP interface is shared between the two Ethernet Routing Switch 8600 with a VRRP Priority of 100 on the other 8600.
- C. VRRP has been configured on the other 8600.
- D. The Ethernet Routing Switch 8600s are in the same VRRP group with different VRIDs.

Answer: D

Question: 5

To monitor the performance of an Enterprise Network (JDM)?

- A. OmniView supports JDM.
- B. JDM is incapable of monitoring performance.
- C. OmniView can perform JDM but does not support Tabular JDM.
- D. JDM works with subnets and LAN segments.

Answer: D

Question: 6

Which three statements are true?

- A. Alarms can only be generated by a single variable.
- B. Alarms have a configurable severity.
- C. String variables can be used in alarm definitions.

Answer: B, D, E
