## Question: 1

All communication between the WLAN Security Switch and Access Point (AP) is encrypted, including all control and management traffic. This feature limits the ability of the Rogue AP to join the network. Which two methods are used to secure this traffic? (Choose two.)

- A. WEP
- B. AES
- C. x.509 certificates
- D. 802.1X/EAP

Answer: B, C

## Question: 2

The WLAN 2300 series offers a number of options for monitoring a Wireless LAN. WLAN Management System (WMS) 2300 can be used to view real-time statistics of clients and Access Points. It can also be important for reporting faults that have occurred on Wireless Security Switches. Which operating system supports the WMS 2300?

- A. ACS
- B. Sun Solaris 2.8
- C. SUSE Linux 10.0
- D. IBM Tivoli Monitoring 6.1

Answer: C

## Question: 3

In the WLAN Security Switch (WSS) 2380, Access Points use forwarding queues to prioritize WLAN traffic. What is responsible for assigning the queue in which traffic is placed?

- A. the IP ToS field
- B. the DSCP value
- C. the mobility domain
- D. the CoS value of the packet

Answer: A

## Question: 4

A Nortel WLAN 2300 Series network contains multiple WLAN Security Switches. One WLAN Security Switch is configured as the primary mobility domain seed. Another WLAN Security Switch is configured as the secondary mobility domain seed. If the primary mobility domain seed becomes unavailable, the secondary mobility domain seed is promoted to be the

2

**primary mobility domain seed. When the original primary mobility domain seed becomes available again, what happens to the recently promoted secondary mobility domain seed?**

- A. The secondary mobility domain seed will remain in its original state.
- B. The secondary mobility domain seed will revert to its original state.
- C. The promoted secondary mobility domain seed will revert to its original state.
- D. The mobility domain seed will remain in its original state.

Answer: B

Question: 5

**A customer is implementing a new authentication method. The customer wants to provide strong authentication for all users already configured.**

- A. NTLM
- B. LDAP
- C. RADIUS Server
- D. Active Directory

Answer: C

Question: 6

**The Wireless Management Suite (WMS) supports several operating systems. Which of the following operating systems is supported on Windows platforms as well as the WMS supported operating systems?**

- A. BSD 6.0
- B. Mandrake
- C. Red Hat
- D. SUSE Linux

Answer: C, D
