Question: 1

A customer is upgrading to Communication Server 1000E Rls. 5.0. During their database configuration, they need to ensure that the Emergency Services for Client Mobility feature is supported, but they are uncertain whether their upgrade supports this application. What prompt(s) should be enabled, and what configuration is needed to ensure this support?

- A. ESA must be disabled. Emergency Response Location (ERL), Emergency Caller Location (ECL) and internal Location Information Service (Package 336) must be programmed.
- B. ESA Package 329 must be enabled and programmed, allowing the Emergency Response Location (ERL) and Emergency Caller Location (ECL) and internal Location Information Service (Package 336) to be used.
- C. New System Type 4021 must be activated before the Emergency Response Location (ERL) and Emergency Caller Location (ECL) appear in Web Station.
- D. The addition of HA Package 410 must be activated before the Emergency Response Location (ERL) and Emergency Caller Location (ECL) appear in Web Station.

Answer: B

Question: 2

A customer is upgrading to Communication Server 1000E Rls. 5.0 and installing new 1110E, 1120E and 1140E IP Phones. The customer also wants an Expansion Module for the IP Phone 1100 Series to be used with the 1110E IP telephones. Which must occur to ensure a successful installation process?

- A. Order the correct IP Phone 1100 Series telephones that support the Expansion Module for the IP Phone 1100 Series.
- B. Follow the testing parameters after installing the IP Phone 1110E connected to an Expansion Module for the IP Phone 1100 Series.
- C. Follow the installation procedure for installing the 1110E IP telephones and connecting the Expansion Module for the IP Phone 1100 Series to the 1110E IP telephones.
- D. Determine the proper power requirements since the IP Phone 1110E connection to the Expansion Module for the IP Phone 1100 Series has a unique power requirement.

Answer: A

Question: 3

A customer has multiple Communication Server (CS) 1000Es. When calls are placed on hold, they want to provide the same music network-wide to their calls. Which configuration is needed for this support?

- A. Network Music is provided only to those calls that are transferred to the music source using Release Link Trunk over H.323.
- B. Music Trunks are installed only on the primary node, connecting to an analog TIE trunk using H.323/SIP virtual trunks. Only calls placed on hold at the primary node will receive this specific music source.

2

- C. Network Time Protocol (NTP) which is used to synchronize local clocks across the network to a single, accurate, third party NTP server, such as a radio clock.
- D. Music Trunks are installed on the remote nodes and connected back to back with an analog TIE trunk, which is used to connect to a Music Trunk Agent. When a music trunk is seized, the Music Trunk Agent sends a SIP virtual trunk. A network music path is established.

Answer: D

Question: 4

A customer is upgrading their COTS with Signaling Gateway. The customer wants to use a COTS with Signaling Gateway. In this configuration

- A. COTS Server runs on the COTS with Signaling Gateway.
- B. COTS Server runs on the COTS with Signaling Gateway.
- C. COTS Server runs on the COTS with Signaling Gateway.
- D. COTS Server runs on the COTS with Signaling Gateway.

wants to use a COTS with Signaling Gateway. In this configuration

Answer: B

Question: 5

A customer has an integrated system with Main Numbers for two sites. The Main Numbers for Site A are answered by an Emergency team is located. The Main Numbers for Site B are answered by a team of users at Site B to see if they can be answered before the transfer of the call. The Main Numbers for Site B are answered by a team of users at Site B to see if they can be answered before the transfer of the call. The Main Numbers for Site B are answered by a team of users at Site B to see if they can be answered before the transfer of the call.

- B. The Main Numbers for Site B are answered by a team of users at Site B to see if they can be answered before the transfer of the call.
- C. The Main Numbers for Site B are answered by a team of users at Site B to see if they can be answered before the transfer of the call.
- D. The Main Numbers for Site B are answered by a team of users at Site B to see if they can be answered before the transfer of the call.

two sites. Their Main Numbers for Site A and are answered by an Emergency team is located. The Main Numbers for Site B are answered by a team of users at Site B to see if they can be answered before the transfer of the call. The Main Numbers for Site B are answered by a team of users at Site B to see if they can be answered before the transfer of the call.

Answer: A
