Question: 1

A designer wants to configure a cluster of ASAs. Which statement best describes the maximum characteristics of the cluster?

- A. One Master with 256 slaves
- B. Four Master with up to 256 slaves
- C. Two Master with up to 256 slaves each
- D. One to 256 Masters with up to a total of 256 slaves

Answer: B

Question: 2

A designer implemented SSL VPN services in a data center. The server group is complaining that they are no longer able to track the users. How can this issue be addressed?

- A. Turn on connection pooling
- B. Add Via header in the HTTP menu
- C. Add X-forwarding-for header in the HTTP menu
- D. Configure Proxy IP addressing on the ingress ports

Answer: C

Question: 3

Company.com is experiencing performance problem with their E-commerce servers. SSL traffic has been determined to be the culprit. They would like to improve performance by load balancing their encrypted traffic based on Layer 7 attributes but used to maintain the encryption to the servers. What is the minimum version of ASA required to facilitate their request?

- A. 2.0
- B. 3.0
- C. 4.0
- D. any version supports the requirement
- E. ASA version 2.4 w/ end to end encryption

Answer: B

Question: 4

Which encryption algorithms are supported by the Alteon Security Gateway?

- A. RC2, and DES3
- B. DES, DES3 only
- C. DES and RC4 (stream)
- D. RC2, RC4 (Stream)
- E. DES3 encryption

Answer: D

Question: 5

A new customer needs a cluster of servers. A design engineer needs to increase throughput between concurrent sessions.

- A. A cluster of two servers
- B. A cluster of four servers
- C. A cluster of three servers
- D. A cluster of three servers

with a maximum of 10,000 concurrent sessions.

Answer: A

Question: 6

A design engineer in the security department has managed to implement TLS 1.0. How should the design engineer restrict this?

- A. Restrict to TLS 1.0
- B. Do nothing. TLS 1.0 is supported.

to meet the security requirements of the department.

Answer: A
