Question: 1

A customer has two Succession 1000/1000M RIs. 3.0 systems installed at separate sites. They have installed Optivity Telephony Manager (OTM) 2.1 and Optivity Network Management System (NMS) 10.1. They want to deploy a Branch Office at a third site. As part of the deployment, they have to configure separate steering codes for new users in the Coordinated Dialing Plan (CDP) of the Branch Office. Which two network management tools provide this functionality? (Choose two.)

- A. Optivity NMS
- B. Element Management
- C. Command Line Interface
- D. OTM accessed via OTM Web Navigator
- E. OTM accessed via OTM Windows Navigator

Answer: B, C

Question: 2

A customer has two Succession 1000/1000M RIs. 3.0 systems installed at two sites. They have installed Optivity Telephony Manager (OTM) 2.1 and Optivity Network Management System (NMS) 10.1 and want to deploy two Symposium Call Center Servers 4.2 networked together. Call center agents on each Symposium system will be in a separate zone. The Gatekeepers have to be configured with the IP addresses of other Gatekeepers. Which network management tool should you recommend to make the required IP configuration changes on these systems?

- A. Command Line Interface
- B. Gatekeeper Element Management
- C. Optivity Telephony Manager (OTM)
- D. Optivity Network Management System (NMS)

Answer: B

Question: 3

A customer has two Succession 1000/1000M RIs. 3.0 systems installed with a third site using Succession Branch Office. They have installed Optivity Telephony Manager (OTM) 2.1 and Optivity Network Management System (NMS) 10.1. They want to be notified when network failures (such as a lost link between a Signaling Server and a Call Server) generate SNMP alarms. The notification is to generate a page for a technician. Which network management tool provides this alarm notification functionality?

- A. Optivity NMS

2

- B. Optivity Fault Manager
- C. OTM General Package
- D. Optivity Policy Services
- E. OTM Premium P
- F. OTM Enhanced
- G. Gatekeeper Ele

Answer: E
