- A. Enable NTP in the Commissioning Wizard.
- B. Use your own watch and enter the time at every shelf you commission
- C. Make sure the laptop you are using to commission the shelves has the accurate time then tell the Wizard to use the PC's time.
- D. Make sure the laptop you are using to commission the shelves has the accurate time then copy-paste it to the Wizard's window

Answer: C

## Question: 3

**You are commissioning an OPTera Metro 5200 shelf; this shelf will need to be a non-GNE Multiple IP address shelf. Which of the following Subnet Mask, Shelf IP and DHCP addresses are suitable?**

- A. Subnet Mask = 255.255.255.255; Shelf IP = 10.1.1.1; DHCP = 10.1.1.2
- B. Subnet Mask = 255 255.255.252, Shelf IP = 192.168.10.49, DHCP = 192.168.10.50
- C. Subnet Mask = 255 255.255.252, Shelf IP = 192.168.10.51; DHCP = 192.168.10.50
- D. Subnet Mask = 255.255.255.255; Shelf IP = 192.168.256 7; DHCP = 192.168.256.6

Answer: B

## Question: 4

**What happens when you use an OPTera Metro 5200 reserved IP address during commissioning of a new shelf?**

- A. The shelf restarts.
- B. Communication with the OPTera Metro 5200 network fails.
- C. The shelf assigns a default address with a broadcast subnet.
- D. The shelf recognizes the reserved address and assigns a default address.

2

Answer: B

Question: 5

You are configuring a service on a router. What would be the benefit of configuring the service?

- A. To connect a router to a network
- B. To enable client access to the network
- C. To allow the directory server to access the network
- D. To enable server access to the network

What would be the benefit of configuring the service?

network.

Answer: C

Question: 6

You are commissioning a new router. The router IP address is 192.168.10.1. You are configuring the router with a Subnet Mask of 255. 255.255 252. What is the result of this configuration?

- A. The shelf restarts
- B. Loss of visibility
- C. No connectivity
- D. The router will not boot

What is the result of this configuration? router IP address is 192.168.10.1. You are configuring the router with a Subnet Mask of 255. 255.255 252. What is the result of this configuration?

Answer: C
