Thanks for purchasing techXams' Study Guide,

techXams' 922-090 study guide is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this guide. An average of approximately 10 to 20 hours should be spent to study this guide and you will surely pass your exam. It's our guarantee.

### Disclaimer

## Question: 1

You have been asked to engineer an IP Peer Networking solution for a Communication Server (CS) 1000 Rls. 5.0 network. The customer requirements include a centralized numbering plan arrangement, and they want to use SIP Trunking. What component is required as part of the centralized numbering plan for the network?

- A. Network Connect Service
- B. H.323 Gatekeeper
- C. Terminal Proxy Server
- D. Network Routing Service

Answer: D

## Question: 2

You have been asked to engineer an IP Peer networking solution for a Communication Server (CS) 1000 Rls. 5.0 network. The customer requirements include a centralized numbering plan arrangement using trunks with Transport Layer Security (TLS) enabled. Which components are required as part of this solution for the network? (Choose two.)

- A. SIP Proxy Server
- B. H.323 Gatekeeper
- C. Terminal Proxy Server
- D. Network Routing Service

Answer: A, D

## Question: 3

A customer is looking to take advantage of the flexibility that a Nortel Solution provides them. They currently have a Communication Server (CS) 1000 Rls. 4.5 network with eight PBX systems connected via IP Peer Networking and the H.323 Protocol. Which options are valid when migrating the customer's network to SIP trunking between the sites? (Choose three.)

- A. Add SIP Access Ports to each CS 1000 system on the network to enable SIP Trunking.
- B. Add SIP Access Port Licenses to each of the existing NRS Platforms on the network.
- C. Enable the SIP Proxy Service on each of the CS 1000 Signaling Server Gateways.
- D. Enable and configure SIP Redirect/Registrar Services on the existing Network Routing Servers (NRS).
- E. Enable and configure the SIP Gateway Services on the various CS 1000 Signaling Server system endpoints.

2

Answer: A, D, E

Question: 4

Which two statements are true regarding the Media Gateway Controller (MGC) capabilities? (Choose two.)

- A. The MGC supports multiple clock controllers.
- B. The MGC provides clock synchronization to the clock controllers.
- C. The MGC provides clock synchronization to the clock controllers.
- D. The MGC supports multiple clock controllers.

Media Gateway Controller (MGC) capabilities? (Choose two.)

000E.  
 clock controllers.

Answer: C, D

Question: 5

A customer is deploying a system with High Availability? (Choose two.)

- A. Software packages are installed on multiple servers.
- B. Software packages are installed on a single server.
- C. Dual Signaling Servers are used.
- D. Alternate Call Servers are used.
- E. Dual Call Processes are used.

requested that  
 der the system

Answer: B, E

Question: 6

Which statement is true regarding the Transport Proxy Server (TPS) in a Communication system network design?

- A. The TPS provides the physical presence in the hardware.
- B. The TPS provides the physical presence in the hardware.
- C. The TPS provides the physical presence in the hardware.
- D. The TPS provides the physical presence in the hardware.

Transport Proxy Server (TPS) for a typical single

in the SIP  
 physical presence in the

Answer: B
