Question: 1

When the Revenue Tab in Project Controller is configured for Revenue Recognition to post to revenue. How is the general ledger account selected during the posting process?

- A - In the following order First, from the Task Maintenance screen. If no account is defined, then from the Project Maintenance screen and lastly from the Project Controller Setup screen (Revenue Setup Tab).
- B - From the project or task, depending on the Percent Complete and Revenue Recognition Setup screen options. If none is defined there, then the Project Controller Revenue Setup Revenue GLAcct is used.
- C - From the GL account that is linked to the Revenue Account Category.
- D - Only from the Revenue Tab of Project Controller Setup.

Answer: B

Question: 2

What wildcard is available for Revenue Recognition General Ledger subaccount postings?

- A - p - Project Subaccount
- B - e - Employee Subaccount
- C - b - Billing Project Subaccount
- D - t - Task Subaccount

Answer: A

Question: 3

The Revenue Recognition process is run in Final mode on May 25. On May 31, the Revenue Recognition process is run again before month end closing. If a project was 80% complete on May 25 and due to additional reclassification expenses posted to the project it is now 75% completed, what postings will be made by Revenue Recognition?

- A - The 5% decrease will be posted to the project and general ledger.
- B - Nothing: Revenue Recognition can only be run in Final mode once each period.
- C - A manual entry to the project and general ledger is required.
- D - The original posting will be deleted and a new posting generated for both the project and general ledger.

Answer: A

Question: 4

For any project related transaction to be eligible for transfer to a project via the Financial Transaction Transfer process the status must be?

- A - Released
- B - Posted

2

- C - Balanced
- D - In Process

Answer: A

Question: 5

A project is set up in October of 2001, and costs and billings are generated. The Year-End Close process is run in Project Controller for 2001. If the Project Profitability Report is run in January of 2002, the PTD and YTD amounts are equal. What happened?

- A - The Year- End Close function processed incorrectly. Re-run Year- End Close to correct the issue.
- B - The contract type was defined incorrectly in Project Maintenance. Selecting the correct contract type will change the PTD amounts.
- C - There are no transactions for January 2002. Once transactions are entered, the PTD and YTD balances will be different.
- D - The project is not set up to carry a balance forward at year-end. Check the box in Project Maintenance and re-run Year-End Close.

Answer: D

Question: 6

At what level(s) are Project Budgets and EACs created?

- A - By General Ledger account.
- B - At the Project level.
- C - For an Account Category within a Task within a Project.
- D - For a Task only within a Project.

Answer: C

Question: 7

What field for selection is the most common field to define in Flexible Report Column Maintenance?

- A - Flexible Key
- B - Project
- C - General Ledger Account
- D - Account Category

Answer: D

Question: 8

Which of the following best describe what happens during the Financial Transaction Transfer (FTT) process?

- A - Project-related transactions are moved from their respective transaction tables to the project transaction table.
- B - Project-related transactions are copied from their respective transaction tables to the project transaction table.
- C - Customer and Vendor balances are transferred to projects.
- D - Only posted General Ledger transactions are transferred to projects.

Answer: B

Question: 9

The users would like to add a field to the Project Maintenance Additional Information screen that defines the type of cargo a ship is carrying. Each ship is set up as a project. What is the correct process for setting up a new field that validates against a user defined table?

- A - Enter values in the Code File Maintenance screen for Code Type "CARGO" and make a project ID field visible.
- B - Modify Flexible Key Maintenance to refer to the Code Type ARG0?
- C - Use Customization Manager to make a user field visible on the Project Maintenance screen so the users can enter the type of cargo.
- D - Create a Code Type to store types of cargo, enter the different types of cargo in the Code File Maintenance screen, make a project ID Maintenance Field visible and validate it against the new Code Type.

Answer: D

Question: 10

Which of the following best describes EAC?

- A - A revised budget amount for the period or project.
- B - A remaining budget amount for the period or project.
- C - Contract changes for the project.
