Question: 1

You have created a Microsoft Excel spreadsheet which you would like to launch from within Headquarters Manager. How can you configure this?

- A. Copy the Excel file to a directory where you will store all add-ins. Edit the add-ins path in the RMSHQ.ini file.
- B. Copy the necessary Excel file to a directory where you will store all add-ins. In Headquarters Administrator, configure the path to the folder in the Headquarters Configuration window.
- C. All third-party files and add-ins must be located in the folder where the Headquarters application files were installed; no configuration is necessary.
- D. None of the above; Headquarters Manager does not have the ability to launch other application's files.

Answer: B

Question: 2

You currently have one store running Store Operations and are implementing Headquarters. You plan to have Global Customers within the Headquarters enterprise. What should you do to mark the existing customers as global in the existing Store Operations database?

- A. At the store, mark the "Enable global customers for multi-store" Configuration option
- B. At the store, mark the "New customers default as global customers" Configuration option
- C. Set up the Global Customer Account Options in Headquarters Manager
- D. Run a Transact-SQL (T-SQL) statement to update the customers' "Customer is a global/enterprise customer" option

Answer: D

Question: 3

You have multiple stores using Store Operations. You have recently purchased Headquarters to consolidate your enterprise data. Which method should you perform to create the Headquarters database which will contains the stores' items and suppliers?

- A. Create a blank Headquarters database using the RMSHQdb.bck file; then manually create records for each item and supplier using Headquarters Manager.
- B. Import the records from one of the store's Store Operations databases into the head office database. Then, in Headquarters Manager, manually create records for each of the other store's items and suppliers.
- C. Import the records from one of the store's Store Operations databases into the head office database. Then, in Headquarters Administrator, use the Import Store Operations command for each of the other store's databases.

2

D. Create a 'master' store database by importing each of the store's records into one Store Operations database. Then, in Headquarters Administrator, import the master store database using the Import Store Operations command.

Answer: D

Question: 4
