Question: 1

Exhibit:

Given the block diagram and the maximum load shown in the exhibit, what is the available power?

- A. 20KW wired for capacity
- B. 20KW wired for redundancy
- C. 30KW wired for redundancy
- D. 40KW wired for capacity

Answer: B

2

Question: 2

If a rack-mount PDU is used to distribute power to the server rack and isolates the electric power to the server rack, which of the following is the most likely reason?

- A. TVSS
- B. Transformer
- C. Circuit breaker
- D. Automatic Transfer Switch

Answer: C

Question: 3

What physical properties of a server rack are most likely to affect the amount of cooling it will require?

- A. size of printed circuit boards
- B. weight of electrical components
- C. location of components
- D. inefficiency of components

Answer: D

Question: 4

What is current?

- A. the flow of electrons
- B. the potential difference
- C. the capability of a circuit
- D. the amount of power

Answer: A

What are the advantages of a raised floor?

- A. A raised floor is easy to install.
- B. It does not take up a lot of space.
- C. It is easily maintained and cleaned.
- D. Condensation is above the drop ceiling.
- E. A contractor is not necessary for installation.

PB0-200 Demo Exam

Answer: A, B

Question: 6

Which type air conditioning system is most suitable for the entire system?

- A. air cooled
- B. chilled water
- C. water cooled
- D. glycol cooled

Answer: A

Question: 7

What is "voltage"?

- A. Electromotive force
- B. The flow of electrons
- C. The potential difference
- D. The ability of a circuit to do work
- E. The energy given to a circuit

Answer: A, C

Question: 8

What are two advantages of a raised floor?

- A. A raised floor is easy to install
- B. It does not take up much space
- C. It is easily maintained
- D. Condensation is reduced
- E. A contractor is not needed

Answer: A, B
