

BI0-132

(Cognos 8 BI Metadata Model Developer)

Document version: 9.30.06

Important Note, Please Read Carefully

techeXams' BIO-132 Exam is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this exam questions. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. It's our guarantee.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at techeXams and update 3-4 days before the scheduled exam date. Here is the procedure to get the latest version:

1. Go to <http://www.techeXams.ws/>
2. Log in the User Center
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you find any possible improvement, then please do let us know. We are always interested in improving the quality of this product. Feedback can be send at: customer.service@techeXams.ws

Explanations

This product does not include explanations for all questions at the moment. If you are interested in providing explanations for this exam, please contact customer.service@techeXams.ws.

Question: 1

A recursive relationship exists between SALES_STAFF_CODE and MANAGER_CODE in the SALES_STAFF data source query subject. This query subject is provided in a model to report authors. Using this query subject alone, report authors cannot create a report that includes management staff and the sales staff that report to them. How can the existing recursive relationship in the model be modified to provide this ability to report authors?

- A. Import a query subject that does not contain a recursive relationship.
- B. Create a star schema grouping that contains the SALES_STAFF data source query subject and a shortcut to the SALES_STAFF data source query subject.
- C. Create a model query subject with the appropriate relationship to the existing SALES_STAFF data source query subject and make both available to report authors.
- D. Create a shortcut to the SALES_STAFF data source query subject, and report authors will use it instead of the underlying query subject to create the required report.

Answer: C

Question: 2

Which of the following are proven practices for organizing the objects in a project?

- A. When importing metadata from more than one data source, include all imported objects in the root namespace.
- B. When importing metadata from more than one data source, create a separate folder for the imported objects from each data source.
- C. When importing metadata from more than one data source, create a separate namespace for the imported objects from each data source.
- D. When importing metadata from more than one data source, do not override the relationships defined between the data sources at the time of import.

Answer: C

Question: 3

In Cognos 8, what are the two distinct model types authors can work with?

- A. OLAP and DMR
- B. Dimensional and DMR
- C. Relational and SAP BW
- D. Relational and Dimensional

Answer: D

Question: 4

When a modeler imports metadata into Framework Manager, the Usage property for a non-indexed, numeric query item is set to which of the following?

- A. Fact
- B. Attribute
- C. Identifier
- D. Unknown

Answer: A

Question: 5

When importing metadata into Framework Manager from a relational database, which of the following can be controlled by the modeler performing the import?

- A. Defining multiple connections to the data source.
- B. Specifying the usage property for generated query items.
- C. Converting inner joins in the database to outer joins in the model.
- D. Generating relationships based on existing primary and foreign key relationships in the database.

Answer: D

Question: 6

Which of the following is true for 0..n cardinality?

- A. The cardinality is optional and a union will be performed.
- B. The cardinality is optional and an inner join will be performed.
- C. The cardinality is optional and an outer join will be performed.
- D. The cardinality is unknown and an inner join will be performed.

Answer: C

Question: 7

Which of the following objects in the Framework Manager environment acts as a container and provides a unique name for objects?

- A. model

- B. query item
- C. namespace
- D. query subject

Answer: C

Question: 8

To create a report in Cognos, you must create a report specification.

- A. A report specification
- B. A development project
- C. The runtime version
- D. A file that contains the report definition

subject?

er.

Answer: C

Question: 9

After metadata is imported into a Cognos project, it is recommended to perform the following tasks:

- A. Usage
- B. Format
- C. Data Type
- D. Semi-Aggregate

subject is created, it is recommended to perform the following tasks?

Answer: A

Question: 10

In Framework Manager, you can create a multi-lingual project.

- B. A project
- C. A language
- D. When a new language is added as well.

When working with a multi-lingual project, you can create a project.

Answer: C
