Question: 1

What is the difference between primary and secondary DNS servers?

- A. Only primary servers can issue authoritative responses.
- B. Primary servers host the original copy of the zone database file.
- C. Primary servers resolve names more efficiently than secondary servers.
- D. Secondary servers act as back-ups and will respond only if the primary fails.

Answer: B

Question: 2

What might happen if the big3d agent becomes overloaded due to a large number of local DNSs making resolution requests?

- A. The TTL setting for the Wide-IP increases.
- B. Some probe statistics may fail to be updated.
- C. Address responses to local DNSs are delayed until the big3d agent recovers.
- D. The 3-DNS System will not respond to DNS queries until the big3d agent recovers.

Answer: B

Question: 3

A 3-DNS System performs a name resolution that is not a Wide-IP. The name is in a domain for which the 3-DNS System is authoritative. Where does the information come from?

- A. 3-DNS System cannot resolve a host name that is not a Wide-IP.
- B. It comes from BIND database (zone) files on the 3-DNS System.
- C. It comes from the database of previously cached name resolutions.
- D. It comes from a zone transfer initiated when the request was received.

Answer: B

Question: 4

A Wide-IP has two pools. The first has a set of five Virtual Servers. The second pool redirects requests to a Content Delivery Network (CDN). How can limits and thresholds be used to manage traffic for this Wide-IP? (Choose two.)

- A. If requests exceed the first pool's threshold, additional requests can be sent to the CDN.
- B. If requests exceed the second pool's threshold, additional requests can be sent to the Virtual Servers in the first pool.
- C. If requests exceed the Wide-IP's threshold, additional requests can be ignored to prevent overloading the Virtual Servers.
- D. If requests exceed the second pool's threshold, additional requests can be load balanced between the Virtual Servers and the CDN.

2

Answer: A, B

Question: 5

A specific ECV can be

- A. a Virtual Server
- B. all Virtual Servers
- C. all Virtual Servers
- D. all Virtual Servers

EEO-503 Demo Exam

Answer: C

Question: 6

During the Setup Utility

- A. IP address restriction
- B. names of zones
- C. password of the
- D. 3-DNS System I

(three.)

configuration

Answer: A, C, D

Question: 7

What function can be performed on the list of servers known

- A. The new 3-DNS
- B. The new 3-DNS
- C. The new 3-DNS
- D. The new 3-DNS Center.
