## Question: 1

If a self-IP's port lockdown is set to "allow 443", which statement describes allowed communication to that address?

- A. Access is available to the Configuration Utility.
- B. Serial console access is prevented since only port 443 access is allowed.
- C. Access may be available via SSH dependent upon the /etc/host.allow settings.
- D. The partner BIG-IP will be able to synchronize and mirror connection and persistence information.

Answer: A

## Question: 2

Which file contains the allowed IP addresses for SSH access?

- A. /etc/hosts.deny
- B. /etc/sshd\_allow
- C. /etc/hosts.allow
- D. /etc/sshd\_secure

Answer: C

## Question: 3

If a self-IP port lockdown is set to "allow default", which three ports will accept administrative traffic? (Choose three.)

- A. SSH
- B. DNS
- C. HTTP
- D. SMTP
- E. HTTPS

Answer: A, B, E

## Question: 4

Which statement is true concerning packet filters?

- A. Filters cannot prevent application viruses.
- B. Filters cannot prevent the BIG-IP synching process from taking place.  
The order of filters does not affect which traffic is accepted or denied.
- D. In addition to administrator-created filters, there always exists a "deny all" filter that processes traffic last.

2

Answer: A

Question: 5

As a part of the Setup process, what would be the result of the following configuration?  
**name?**

- A. Host names do not change.
- B. In a redundant pair, the configuration is synchronized between the two devices.
- C. The first time the device is accessed, it will use the self-IP addresses assigned in the configuration.
- D. When the administrator logs in, they will always connect to the same host.

the BIG-IP. What would be the result of the following configuration?  
**the same host**

- e. The parameter is not set.
- f. The parameter is set to the same value as the host name.
- g. The parameter is set to the same value as the host name, but only if the host name is not set.
- h. The parameter is set to the same value as the host name, but only if the host name is not set and the parameter is not set.

Answer: C

Question: 6

Which result could occur from the following configuration?

- A. A monitor can be created.
- B. A virtual server can be created.
- C. An iRule can be created.
