Question: 1

What are the three types of fabric zoning on B-series switches? (Choose three.)

- A. static zoning
- B. software zoning
- C. hardware zoning
- D. mixmode zoning
- E. QuickLoop zoning

Answer: B, C, D

Question: 2

In a single fabric, when multiple paths exist between a host and its storage, which statement is true?

- A. The result could be an unstable fabric.
- B. Load sharing is automatically set to static.
- C. The FSPF protocol determines best route.
- D. The path used is determined by port priority.

Answer: C

Question: 3

What is the correct statement about zoning in an interoperable fabric?

- A. WWPN zoning is the only allowed method.
- B. A mixture of domain ID, port number and WWPN zoning is allowed.
- C. Domain ID and port number zoning are the only allowed methods.
- D. Zoning is not allowed. The only way to segment a fabric is using the VSAN technology of C-Series switches.

Answer: A

Question: 4

What is the maximum distance per cable segment using 9/125 micron single-mode cable and long wavelength 2 Gb SFPs?

- A. 1 km
- B. 5km
- C. 10km
- D. 35km
- E. 100 km

Answer: C

Question: 5

What is the internal latency of a Fibre Channel switch?

- A. between 1us and 3us
- B. 3us
- C. 5us
- D. 33us
- E. 650us

h?

Answer: A

Question: 6

Three LUNs, sda, sdb, and sdc are mapped to a server and physically removed from the server.

- A. The LUNs sda and sdb are visible to the server.
- B. The LUN sda is visible to the server.
- C. The LUNs sda and sdb are visible to the server.
- D. The LUNs sda and sdb are visible to the server.

down the server

can.
ame
vice scan.
ating a virtual

Answer: B

Question: 7

What is a Fibre Channel routing table?

- A. one or more switch
- B. two or more switch

outing table
outing table

- D. two or more switch
- routing table

Answer: A
