- B. A special HP Data Protector Software backup object
- C. A default configuration file provided with the VLS
- D. A previously saved configuration file

Answer: D

Question: 2

Which virtual library systems provide data compression without impeding performance, using a hardware compression card? (Select two.)

- A. VLS9000
- B. VLS6600
- C. VLS6500
- D. VLS6200
- E. VLS6100

Answer: A, B

Question: 3

Due to a RAID volume failure on the primary node, the operating system of a VLS9000 becomes corrupted. How do you recover the system?

- A. Power down all secondary nodes, recover the system using the VLS Quick Restore CD or DVD, and recover the VLS configuration from the previously saved configuration file.
- B. Open a Command View VLS session and select autorestore node 0 in the Utilities tab.
- C. Order preinstalled replacement drives from HP Services and recover the VLS configuration files after the disks are replaced. Node 0 will restart automatically.
- D. Repair the failed RAID volume, erase all virtual media from the disk array enclosures, and rebuild all RAID volumes on the affected storage pool.

Answer: A

Question: 4

What is an advantage of using the automigration feature of virtual library systems?

- A. The tapes are automatically migrated to the destination tape library when those files are copied.
- B. It leverages object-based storage to improve performance and scalability.
- C. The destination tape library can be restored by any tape library.
- D. It delivers faster copy of backup data.
