

HP0-J29

(Replication Solutions for the HP Storage Works EVA)

Total Questions: 70

Last Updated: Jan 22, 2009

Document version: 8.27.11

Thanks for purchasing techXams' Study Guide,

techXams' HP0-J29 study guide is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this guide. An average of approximately 10 to 20 hours should be spent to study this guide and you will surely pass your exam. It's our guarantee.

Disclaimer

Question: 1

A Windows server is running Command View and HP Replication Solutions Manager (RSM). While executing an RSM replication script, it is rebooted by the addition of new security patches from Microsoft. What happens to that script?

- A. System shutdown is delayed until the replication script is finished.
- B. Any snapshots and snapclones currently in progress are suspended.
- C. Running replication tasks are queued and continued after the reboot.
- D. The replication script is aborted and will require a manual restart.

Answer: C

Question: 2

What would you use to obtain a Recovery Point Objective (RPO) of zero in failsafe mode and a low performance impact?

- A. A latency less than or equal to 10ms in enhanced asynchronous replication mode
- B. A latency less than or equal to 120ms in asynchronous replication mode
- C. A 4Gb/s link with low latency in synchronous replication mode
- D. An 8Gb/s link with medium to high latency in synchronous replication mode

Answer: C

Question: 3

What is a demand allocated snapshot also known as?

- A. Replica snapshot
- B. Dynamic snapshot
- C. Instantaneous snapshot
- D. Virtual snapshot

Answer: D

Question: 4

When implementing VMware Site Recovery Manager (SRM) in a Continuous Access EVA environment, what is required in addition to the SRM software?

- A. Replication Solution Manager host agent
- B. HP EVAx000 VDS1.0 and VDS1.1/VSS Hardware Providers
- C. HP StorageWorks EVA Virtualization Adapter
- D. HP EVA VDS/VSS 2.0 Hardware Providers

Answer: C

Question: 5

What is meant by the term HP StorageWorks Enterprise Virtual Array?

- A. Using synchronous replication between two Enterprise Virtual Arrays is supported.
- B. One Enterprise Virtual Array can be replicated to three Enterprise Virtual Arrays.
- C. Three Enterprise Virtual Arrays can be replicated to one Enterprise Virtual Array.
- D. Using asynchronous replication between two Enterprise Virtual Arrays is supported.
- E. One Enterprise Virtual Array can be replicated to two other Enterprise Virtual Arrays.

HP StorageWorks

two Enterprise Virtual
 r Enterprise Virtual
 Enterprise Virtual
 two Enterprise Virtual
 e other Enterprise

Answer: B, C

Question: 6

When designing EVA replication configuration, which ratio of host to EVA is recommended?

- A. 1:4
- B. 2:4
- C. 3:1
- D. 4:2

configuration,

Answer: C

Question: 7

req

- A. 2
- B. 8
- C. 4
- D. 12

Answer: C
