**In addition to the device location on the floor plan, what is the “bare minimum” of information required to create a proper design? (Select three.)**

- A. IP addresses
- B. monthly page volumes
- C. color or mono
- D. finishing options needed
- E. install dates F. connectivity

Answer: B,F,E

## Question: 2

**When executing data collection on a floor, which "strategy" is recommended to minimize missing devices?**

- A. start at the entry of a floor/area and methodically work your way to the farthest corner
- B. start on the left side of the entry of a floor/area and work your way clockwise
- C. start at the farthest corner from the entry to a floor/area and work your way back to the entry
- D. start on the right side of the entrance of a floor and work your way counter-clockwise

Answer: A

## Question: 3

**Which statement is true about calculating/estimating monthly page volumes for future recommendations?**

- A. Monthly page volumes must be defined, based on monitoring.
- B. Monthly page volumes can be roughly estimated and then verified during the first three months after the new devices roll-out.
- C. Monthly page volumes must be traceable and justifiable.
- D. Because monthly page volumes are less important than total engine count, they can be neglected

## Question: 4

**Which general assessment methods supplement each other and allow the collection of comprehensive device fleet data?**

- A. remote discovery and onsite discovery
- B. remote discovery and HP Web Jetadmin
- C. onsite discovery and company tour
- D. company tour and onsite discovery

Answer: A

## Question: 5
