Question: 1

Using persistent images, the customer reports incomplete images. What is the most probable cause?

- A. The disk is full.
- B. A concurrent backup job terminates image creation.
- C. A quiescence time less than 5 seconds can cause an incomplete image.

Answer: C

Question: 2

You must perform diagnostics on a DL585G2 Storage Server. Where do you find the required HP Insight Diagnostics Offline Edition tool?

- A. on the SmartStart CD
- B. on the System Recovery DVD
- C. on the HP directory of the storage server
- C. on the HP Support and Drivers website as a downloadable file

Answer: A

Question: 3

During a capacity upgrade on an HP ProLiant DL100 G2 Storage Server, the hard drive Online LED (green) and the Fault LED (amber) flash regularly. What does this indicate?

- A. A faulty power supply caused a non-critical voltage decrease.
- B. A member disk of a redundant RAID array failed and no spare disk is available.
- C. A predictive failure alert has been received; the disk should be replaced immediately.
- C. A predictive failure alert has been received from a member disk of a redundant RAID array; data migration is in progress.

Answer: D

Question: 4

What is a feature of RAID 6 (ADG)?

- A. stripes data across several RAID 1 sets
- B. uses two independent disks as a hot-spare resource
- C. allocates two sets of parity data across multiple drives
- C. allows three simultaneous drive failures without downtime or data loss

Answer: C

Question: 5

Which software product is used with an HP ProLiant DL380 G5 Data Protection Storage Server to provide rapid and reliable recovery, near-continuous data protection, and operational simplicity for disk-based backup of Windows file servers?

- A. HP StorageWorks Storage Mirroring
- B. HP Data Protector Express Software
- C. Microsoft Content Management Server
- C. HP Ultimate Business Protection Snap-In E. Microsoft System Center Data Protection Manager

Answer: E

Question: 6

What is the purpose of a NAS server?

- A. aggregates network bandwidth across multiple area networks
- B. allows multi-network protocol to be routed across network segments
- C. performs the same role as a general file server, but also emulates multiple file systems
- C. provides a gateway protocol that allows SAN storage to be presented across Ethernet networks

Answer: C

Question: 7

Which HP PolyServe technology in the EFS Clustered gateway solution assures data integrity and cache coherency even when node failures occur?

- A. Matrix Volume Manager
- B. Virtual File Server (VFS) Cluster
- C. Symmetrical Cluster File System
- C. Enhanced Linux file serving environment

Answer: C

Question: 8

A customer requests cluster support for HP StorageWorks storage servers. Which Windows Storage Server 2003 edition supports clusters?

- A. Express
- B. Standard
- C. Enterprise
- C. Workgroup

Answer: C

Question: 9

Which member of the HP ProLiant Storage Server family provides cluster support along with redundant components?

- A. DL100 G2
- B. ML310 G3
- C. ML370 G4
- C. DL380 G4

Answer: D

Question: 10

Which HP ProLiant Storage Server product line is designed for environments with a maximum of five servers connected using iSCSI and no additional license requirements?

- A. HP EFS
- B. All-in-One Storage
- C. HP Storage Server Gateway
- C. HP Storage Server NAS Filer

Answer: B

Question: 11

What is the maximum number of networked printers supported in the Windows Storage Server 2003 R2 Workgroup edition?

- A. 2
- B. 3
- C. 4
- C. 5

Answer: D

Question: 12

You are integrating a NAS solution using Multifunction NICs at a customer site and you want to install the Microsoft Windows Server 2003 Scalable Networking Pack. Which resources can you use to obtain this software pack? (Select two.)

- A. Microsoft website
- B. HP Support website
- C. HP Bizsupport website
- C. HP ProLiant Support Pack E. Windows 2003 Service Pack 2

Answer: A

Question: 13

The internal health LED of an HP StorageWorks 600 All-in-One storage system front panel is amber. What is indicated?

- A. a non-critical error
- B. critical system health
- C. degraded system health
- C. a power redundancy failure

Answer: C

Question: 14

What is the maximum memory supported in the Windows version of an HP DL385 G5 Clustered Gateway node?

- A. 2GB
- C. 16GB
- C. 32GB

Answer: D

Get Full Version of Exam HP2-K14 PDF Q&A

techeXams presents authentic, genuine and valid study material, which promise 100% success in very first attempt. To take optimal results for HP2-K14 exam, you need to buy full version of HP2-K14 question and answer. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. So come join us and quench your thirst for knowledge.
