## Question: 1

**A ScreenOS firewall has the correct interfaces addressed and active. A policy is written allowing interzone FTP traffic from a directly connected client. But the traffic does not cross the firewall from the client to the server. What is the most likely problem with the firewall?**

- A. The ScreenOS firewall has no physical connection to the FTP server.
- B. The ALG option on the ScreenOS firewall has not been enabled for FTP traffic.
- C. The ScreenOS firewall does not have a route defined to the FTP servers' subnet.
- D. The ScreenOS firewall does not have a route defined to the FTP clients subnet.

Answer: C

## Question: 2

**A ScreenOS firewall is running in transparent mode. The firewall receives a packet which has no entry in its forwarding table. What will the firewall do?**

- A. Flood out all ports.
- B. Check its route table for interzone destination.
- C. Perform a policy lookup to determine the interfaces to which the source address is permitted, and flood the packet out of those interfaces.
- D. Perform a policy lookup to determine the zones to which the source address is permitted, and flood the packet out the interfaces bound to those zones.

Answer: D

## Question: 3

**Which three options allow proper configuration of NAT-dst? (Choose three.)**

- A. the default address book entry of "any" in the internal zone
- B. the default address book entry of "any" in the external zone
- C. a secondary address on one of the interfaces in the internal zone
- D. an address book entry for the address to be translated in the internal zone
- E. a static route to the appropriate subnet using a private interface as the outbound interface

Answer: C, D, E

## Question: 4

**Which two statements are true in regards to a ScreenOS firewall in transparent mode? (Choose two.)**

- A. VPNs can terminate to the VLAN1 interface IP address.
- B. Static routes must be configured if multiple virtual routers are going to be used.

2

- C. It can be installed in a network without the requirement to reconfigure IP addressing schemes.
- D. You must use the console port to manage the device as you cannot manage the device using an Ethernet port.

Answer: A, C

Question: 5

**What are three major security concerns for a network medium? (Choose three.)**

- A. integrity
- B. authority
- C. capacity
- D. confidentiality
- E. authentication

What are three major security concerns for a network medium? (Choose three.)

Answer: A, D, E

Question: 6

**By default, from where does the router load the ScreenOS software?**

- A. NVRAM
- B. TFTP server
- C. internal flash
- D. PCMCIA card

By default, from where does the router load the ScreenOS software?

Answer: C

Question: 7

**Which three must be configured for a policy to be applied to a traffic flow?**

- C. action
- D. application
- E. policy name

Answer: A, B, C
