Question: 1

Which three statements are true regarding split-tunneling modes? (Choose three.)

- A. Choosing "Enable Split Tunneling with route change monitor" allows Network Connect to update the routing table if a route change is detected.
- B. Choosing "Disable Split Tunneling" forces all traffic through the Network Connect tunnel.
- C. Choosing "Enable Split Tunneling" will modify routes on the client so that any networks defined in the split-tunneling policy are routed through Network Connect.
- D. Choosing "Allow access to local subnet" will not modify the route table on the local client.
- E. Choosing "Enable Split Tunneling with allowed access to local subnet" requires that local resources be defined in the Network Connect access control list.

Answer: B, C, E

Question: 2

What should you do when you need to create a meeting on demand to troubleshoot a client issue?

- A. Schedule an on demand meeting that begins in 10 minutes.
- B. Schedule an instant meeting through Secure Meeting.
- C. Start up a support meeting.
- D. Start a secure meeting through the Microsoft Outlook plug-in.

Answer: C

Question: 3

Which statement about CRLs is true?

- A. CRLs are distributed automatically by the CA.
- B. CDP can be used to automatically validate a CRL.
- C. The base CRL contains only a subset of the certificates issued by a given CA.
- D. CRLs contain the serial number, revocation date, and reason code for withdrawn certificates.

Answer: D

Question: 4
