

## **MB4-213**

(Microsoft Dynamics Solomon 6.0 Tools for Visual Basic)

Document version: 9.30.06

## Important Note, Please Read Carefully

techeXams' MB4-213 Exam is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this exam questions. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. It's our guarantee.

### Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at techeXams and update 3-4 days before the scheduled exam date. Here is the procedure to get the latest version:

1. Go to <http://www.techeXams.ws/>
2. Log in the User Center
3. The latest versions of all purchased products are downloadable from here. Just click the links.

### Feedback

If you find any possible improvement, then please do let us know. We are always interested in improving the quality of this product. Feedback can be send at: **customer.service@techeXams.ws**

### Explanations

This product does not include explanations for all questions at the moment. If you are interested in providing explanations for this exam, please contact **customer.service@techeXams.ws**.

## Question: 1

**There are important differences between a normal level and a detail level. What statements are true about a detail level?**

- A - The detail level must always be implemented using a spreadsheet control.
- B - The detail level is not always implemented using a spreadsheet control.
- C - More than one record can be retrieved from the database and displayed at one time.
- D - Only one copy of a record is displayed from the database. The user must commit or abandon changes before moving to another record.

Answer: A, C

## Question: 2

**When adding new tables to the Solomon database, which restrictions must you follow?**

- A - Table names must not contain spaces.
- B - Table names must not begin with a number.
- C - Table names can not be longer than 8 characters
- D - Table names must contain a special character.

Answer: A, B

## Question: 3

**Which property of a control is used to tell the kernel that it is a key field?**

- A - default
- B - level
- C - tag
- D - DBNav

Answer: B

## Question: 4

**The Solomon kernel is designed to automatically manage the unique identity of records in a detail level by which of the following methods?**

- A - By the tab sequence of the fields in the spreadsheet.
- B - By locating the definition of the primary index on the table in the database and then automatically enforcing that rule in the user interface.
- C - By the ordinal position in which the user entered the records into the spreadsheet.
- D - By one or more key fields which are visible in the spreadsheet.

2

Answer: C, D

Question: 5

**Which statement is true about Record Maintenance?**

- A - This utility program actually creates new tables in the Solomon database.
- B - This utility is used to define the following properties of a table: Name, Fields and Indexes.
- C - This utility allows a developer to define the names of new tables. It does not actually create tables in the Solomon database.
- D - This utility reads the actual database schema from the Solomon database and displays all actual tables in that database except for MS SQL system tables.

Answer: C

Question: 6

**What utility can be used to create text files which contain VB Code and SQL statements that will create a table? The extensions of the two files created will be "DH" and "CRT".**

- A - Generate Schema
- B - Record Maintenance
- C - Parent.exe
- D - Field Maintenance

Answer: A

Question: 7

**Occasionally, data displayed in a field on a window will appear in a different format than what is shown when viewed directly from the database. What property can be checked and/or changed so the data is converted and displayed with the correct format?**

- A - Fieldclass
- B - Fieldname
- C - Default
- D - Mask

Answer: A, D

Question: 8

**When the Solomon application is launched, which main programs are started?**

- A - Visual Basic
- B - Parent.exe
- C - Kernel
- D - Customization Manager

Answer: B, C

Question: 9

**In order for the Kernel to be able to manage records in the database, data must be broken into logically related groups. What term is used to refer to these groups?**

- A - data groups
- B - related records
- C - levels
- D - groupies

Answer: C

Question: 10

**What conditions would require a SetAddr call?**

- A - If the Solomon Kernel will be responsible for managing the buffer as the primary table for a level.
- B - If controls for displaying and updating fields of the buffer are needed.
- C - If you wish to expose the variable for access through Customization Manager.
- D - If you wish to expose the variable for access through Record Maintenance.

Answer: A, B, C

Question: 11

**What type of container object must be used to contain the data controls and grid controls for a detail level?**

- A - Standard Visual Basic Frame control
- B - Standard Visual Basic Tab control
- C - SAF Container control
- D - Any container type control can be used

Answer: B

Question: 12

Once the user chooses a company from the Login screen they will be connected to two databases, an application and system database. What type of information is contained in the System Database?

- A - Product Registration
- B - Accounting Information
- C - Customizations
- D - Users and Groups

Answer: A, C, D

Question: 13

When a user moves to a line in a grid, the kernel triggers a LineGotFocus event in the Solomon Tools for Visual Basic program. What best describes the purpose of the information that the kernel passes to this event via the MaintFlg parameter?

- A - The value indicates the status of the line the user just moved to.
- B - The value indicates the status of the line the user just left.
- C - The value indicates the status of the logical level the grid is associated with.
- D - The value indicates whether the user interlace is currently in "grid view" or "form view".

Answer: A

Question: 14

What is true when working with a spreadsheet control?

- A - It must be placed into a container.
- B - It must be the same size as the container.
- C - The Kernel will format the control at run time.
- D - The name property of the spreadsheet control must match the name used in the Detail setup call.

Answer: A, C, D

Question: 15

Solomon uses a standard naming convention for many files used during development. Which file extension is used for SQL script files that contain CREATE INDEX statements?

- A - CRT
- B - CRX
- C - CRP

5

D - CSV

Answer: B

Question: 16

Although these are starting a new Tool

practices when

- A - Name the VBP program being created
- B - Do not overwrite existing files
- D - Save the VBP files in a separate directory.
- D - Contact Microsoft for more information on the tables you will be using

been number for the  
directory.  
names for any new

Answer: A, B, C

Question: 17

By default, setting the field and force the

entered into a

- A - DBNav
- B - FieldName
- C - PV
- D - Default

Answer: C

Question: 18

How many

- A - 1
- B - 2
- C - 3
- D - 4

Answer: D
