Question: 1

Mike works in an International company which is called Taskeen, recently he has finished a project successfully. Now he is going to start a new project cooperating with the same team. In order to set up the validation rules to apply to the new project, what are the three ways to do this?(choose more than one)

- A. Add the new project to the existing Employee/Category group.
- B. Select the Validation employees check box on the Setup tab of the new project
- C. Locate the individual employees in the Employee table and link them to the new project.
- D. Copy the old project using the Copy wizard and include the employee/project validation setup in the new project

Answer: A, C, D

Question: 2

You work in an International company which is called Taskeen, and you're in charge of the network. Now one of your colleagues asks for your help, he has no idea about in the options below, which is not a Project Control screen. So what's your answer?

- A. Cost Control
- B. Hour Utilization
- C. On-Account Control
- D. Project Statements

Answer: C

Question: 3

You work in an International company which is called Taskeen. On a time and material project all fee transactions except for On Call Service fees are to be accrued. When you post it from the fee journal, what should you do to make sure that revenue is not accrued?

- A. Enter the revenue amount as a credit amount by entering a minus in front of the amount.
- B. On a line property, specify that it cannot be accrued, and then apply this line property for the fee transaction in question.
- C. In the validation setup on the project itself, specify which categories are not to be included in the accrual calculation.
- D. Create a new fee journal and, on the General tab under Posting, specify that revenue entered in this journal cannot be accrued.

Answer: B

Question: 4

You work in an International company which is called Taskeen, and work as the project manager. When forecasting hours for a project, you're not sure of the specific hours that will be worked by each employee of your team, but you can estimate the total hours that will be worked on the project. Which of the following options will NOT give the manager an accurate representation of labor cost in the forecast?

- A. This is not a problem because employee is not a required field on hour forecasts.
- B. Set up a generic employee with a blended cost price to simulate the average cost and use that to forecast hours.
- C. This cannot be done because employee is a required field on hour forecast and cost price cannot be modified on the forecast.
- D. Create the forecast with any employee and change the cost price to an estimate of what the average cost price for each employee might be.

Answer: Pending

Question: 5

You work in an International company which is called Taskeen, and you're in charge of the network. Now one of your colleagues asks for your help, he has no idea about the difference between operations scheduling and job scheduling. So what's your answer?

- A. Job scheduling will schedule only one project, while operations scheduling will schedule all open projects.
- B. Job scheduling considers the capacity of the work center, while operations scheduling is not concerned with capacity.
- C. Job scheduling uses the capacity of the individual work center, while operations scheduling uses the capacity of the work center group.
- D. Job scheduling automatically puts the project that it is scheduling as first in line and moves other jobs back, while operations scheduling will not move the other jobs that are scheduled.

Answer: C

Question: 6

You work in an International company which is called Taskeen, and you're in charge of the network. Now one of your colleagues asks for your help, he has no idea about which of the following is caused by creating the project directly from the project quotation. So what's your answer?

- A. Only a new project can be created from the quotation.
- B. Project quotations cannot be used to create new projects.
- C. A forecast can be created directly from the lines in the project quotation.
- D. Journals can automatically be created by using the transactions from the quotation.

3

Answer: C
