

MB7-639

(NAV 5.0 Manufacturing)

Document version: 9.30.06

Important Note, Please Read Carefully

techeXams' MB7-639 Exam is a comprehensive compilation of questions and answers that have been developed by our team of certified professionals. In order to prepare for the actual exam, all you need is to study the content of this exam questions. An average of approximately 10 to 15 hours should be spent to study these exam questions and you will surely pass your exam. It's our guarantee.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at techeXams and update 3-4 days before the scheduled exam date. Here is the procedure to get the latest version:

1. Go to <http://www.techeXams.ws/>
2. Log in the User Center
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you find any possible improvement, then please do let us know. We are always interested in improving the quality of this product. Feedback can be send at: **customer.service@techeXams.ws**

Explanations

This product does not include explanations for all questions at the moment. If you are interested in providing explanations for this exam, please contact **customer.service@techeXams.ws**.

Question: 1

Which field on the Planning tab of the item card is an order quantity modifier? Choose the 3 that apply.

- A. Minimum Order Quantity
- B. Order Multiple
- C. Reorder Point
- D. Maximum Order Quantity

Answer: A, B, D

Question: 2

Your end user wants to use the same "identifier" for all phases of a production order. To do this, you can:

- A. Use the same numbering series for all production order types.
- B. Allow manual numbering for all production order types.
- C. Place a check mark in the Doc. No. is Prod. Order No. field.
- D. There is no way to use the same identifier for all phases of a production order.

Answer: A

Question: 3

A client uses multiple locations for manufacturing. Which of the following fields should be used to show that all locations use raw materials from a single location?

- A. Use Forecast on Locations
- B. Components at Location
- C. Transfer from Code
- D. Preset Output Quantity

Answer: B

Question: 4

What is the Matrix per Version window used for?

- A. To compare the original BOM against the current version
- B. To compare single level BOMs against multilevel BOMs
- C. To compare all existing versions of a production BOM
- D. To compare the current version of a production BOM against the last version

Answer: C

Question: 5

Which of the following are true statements about the use of phantom BOMs? Choose the 3 that apply.

- A. Phantom BOMs allow the MTO process to account for components without creating Item Cards or a production order for the subassembly.
- B. phantom BOM represents a group of items that put together during production.
- C. The time required for assembling a phantom BOM is zero or is in the master item's routing.
- D. Phantom BOM is used for quality control only.

Answer: A, B, C

Question: 6

What is the purpose of the Calculation Formula field?

- A. To rapidly copy a new Production BOM from an existing one
- B. To enter the quantity per assembly in terms of dimensions
- C. To calculate cost standards for a parent from a collection of components
- D. To facilitate a unit of measure conversion

Answer: B

Question: 7

What must the status be in order to modify a production BOM or production BOM version? Choose the 2 that apply.

- A. Amend
- B. New
- C. Under development
- D. Revise

Answer: B, C

Question: 8

In the program, what is the BOM version used to accomplish?

- A. Optimistic concurrency in the manufacturing product
- B. A change in the manufacturing policy
- C. Define different routings for the same product
- D. Engineering Change Control

Question: 9

You want to determine the order release date that will not influence the order release date.

- A. Simulated Plan
- B. Planned Production
- C. Firm Planned Production
- D. Released Production

Answer: D

Ensure that it will not influence the following?

Question: 10

The program supports the reordering parameters.

- A. Fixed Reorder Point
- B. Maximum Quantity
- C. Order policy and quantity
- D. Lot-for-Lot policy

Answer: A

Combination of

Question: 11

Your client manufactures a roll of material. Where is the material produced?

- A. Set the Unit of Measure
- B. Set the Material
- C. Set the Material Group
- D. Set the Material Type

Answer: A

produces it a roll at

OM to roll.

Answer: B
