## Question: 1

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. According to the requirement of your company, you have to install Microsoft Dynamics NAV 2009 in the network. During the deployment, you use one software distribution point and publish the installation package to the group policy objects. But an employee named Jason reports that he still does not have Microsoft Dynamics NAV installed. So what is the reason for this?

- A. This is because the installation package is corrupted
- B. This is because the software distribution point is not accessible.
- C. This is because the corresponding group policy object does not run
- D. This is because the client computers do not meet the minimum requirements for the installation.

Answer: C

## Question: 2

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. There are two departments in your company, one is Sales department, another is Account department. The company manager assigns a task to you that you implement Microsoft Dynamics NAV 2009. When you do this, you must make sure that each division uses its own instance of the database server; users in one of the divisions are not bound to certain computers. So which deployment configuration do you suggest?

- A. You suggest one GPO, One SDP, and one installation package
- B. You suggest one GPO, Two SDPs, and one installation package.
- C. You suggest two GPOs, Two SDPs, and two installation packages with different configuration files.
- D. You suggest two GPOs, One SDP, and two installation packages with different configuration files.

Answer: D

## Question: 3

You work in an international company which is called Wikigo. And you're employed as the Developer for Microsoft Dynamics NAV. According to the requirements of your company manager, Microsoft Dynamics NAV 5.0 has been installed throughout your company. Now the company has a new plan that is to implement Microsoft Dynamics NAV 2009 instead of Microsoft Dynamics NAV 5.0. But at present you are connecting to external components by using the NAS component of Microsoft Dynamics NAV 5.0. In working with external components using NAS in the two-tier architecture, which drawback does the Server tier in the three-tier architecture enable you to eliminate?

2

- A. The Server tier in the three-tier architecture enables you to eliminate the drawback of losses of data.
- B. The Server tier in the three-tier architecture enables you to eliminate the drawback of necessity to use the NAS user interface
- C. The Server tier in the three-tier architecture enables you to eliminate the drawback of limitation to only one process at a time.
- D. The Server tier in the three-tier architecture enables you to eliminate the drawback of overload of the database management system

Answer: C

Question: 4

**You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. You publish Microsoft Dynamics NAV 2009 to a user, in order to make the deployment take effect on the user's machine, what should he do? (choose more than one)**

- A. He is required to log off and back on.
- B. He is required to restart the computer.
- C. He is required to go to Add or Remove Programs and run the Microsoft Dynamics NAV 2009 installation.
- D. He is required to go to Add or Remove Programs and uninstall the previous version of Microsoft Dynamics NAV.

Answer: A, C

Question: 5

**You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. Your company manager assigns a task to you. You have to deploy multiple Microsoft Dynamics NAV 2009 installation packages. You are going to make the deployment with Group Policy, so what can you define software deployment properties for? (choose more than one)**

- A. You can define software deployment properties for all installation packages in a GPO.
- B. You can define software deployment properties for all installation packages within an SDP.
- C. You can define software deployment properties for individual installation packages in a GPO
- D. You can define software deployment properties for individual installation packages within an SDP.

Answer: A, C

## Question: 6

**You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. According to the requirement of your company, you are deploying Microsoft Dynamics 2009 with Windows Server Group Policy, where is it necessary to store the installation source? (choose more than one)**

- A. It's necessary to store the installation source on a local CD/DVD.
- B. It's necessary to store the installation source on a network share
- C. It's necessary to store the installation source in a folder on a local hard disk
- D. It's necessary to store the installation source on the computer running Windows Server.

Answer: B

## Question: 7

**You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. According to the requirement of your company, you have to deploy Microsoft Dynamics NAV 2009. In the options below, which step is required by the published Microsoft Dynamics NAV 2009 deployment? (choose more than one)**

- A. A published Microsoft Dynamics NAV 2009 deployment requires restarting the computer running Windows Server
- B. A published Microsoft Dynamics NAV 2009 deployment requires logging off and on or restarting the client computers.
- C. A published Microsoft Dynamics NAV 2009 deployment requires copying the Microsoft Dynamics NAV 2009 installation package to client computers
- D. A published Microsoft Dynamics NAV 2009 deployment requires running the Microsoft Dynamics NAV 2009 installation from Add or Remove Programs on the client computers

Answer: B, D

## Question: 8

**You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. The options below are statements about deploying Microsoft Dynamics NAV 2009 by assigning it to a user. Do you know which is not true? (choose more than one)**

- A. The application is advertised on the users desktop.
- B. The user opens Add or Remove Programs to run the installation.
- C. The system must be restarted for the deployment to take effect
- D. RoleTailored client is started automatically after the installation

Answer: B, C

Question: 9

**You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. You have Microsoft Dynamics NAV 2009 installed throughout your company. In Microsoft Dynamics NAV 2009 Setup, if you choose the Developer Environment option, which application component is not installed?**

- A. If you choose the Developer Environment option, Demo database is not installed
- B. If you choose the Developer Environment option, Application Server is not installed
- C. If you choose the Developer Environment option, RoleTailored Client is not installed
- D. If you choose the Developer Environment option, Software Development Kit is not installed

Answer: D

Question: 10

**You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. You have Microsoft Dynamics NAV 2009 installed throughout your company. Now you set up a test instance of Microsoft Dynamics NAV 2009, Classic client option, while importing no custom license or database files. . You test the application and then uninstall it. After you uninstall the application, which components remain? (choose more than one)**

- A. After the application itself is uninstalled, License files (for example, fin.flf) remain.
- B. After the application itself is uninstalled, Database files (for example, demo database) remain
- C. After the application itself is uninstalled, Configuration files (for example, customsettings.config) remain.
- D. After the application itself is uninstalled, Software prerequisites (for example, Microsoft .NET Framework) remain

Answer: B, D

Question: 11

**You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. According to the requirements of your company, you have to deploy Microsoft Dynamics NAV 2009. After this is done, you're notified by the manager that the company wants to continue using the Classic client. In the three tier environment, how do you connect the Classic client to the database?**

- A. You specify the name of the computer where Microsoft Dynamics NAV Server tier is installed and the port number in the customsettings.config file
- B. In the Microsoft Dynamics NAV 2009 Classic client, go to File, Database, Open, and in the Server Name field, specify the name of the computer where Microsoft Dynamics NAV Server is installed.

5

C. In the Microsoft Dynamics NAV 2009 Client, go to File, Database, Open, and select the Microsoft SQL Server instance.  
 D. In Microsoft Dynamics NAV 2009 Client, go to File, Database, Open, and select the Microsoft Dynamics NAV 2009 database.

server option, go to File, Database, Open, and select the Microsoft SQL Server instance.  
 computer where  
 option, go to File, Database, Open, and select the Microsoft Dynamics NAV 2009 database.  
 computer where

Answer: C

Question: 12

**You work in an international company as an internal developer of Microsoft Dynamics NAV 2009. The account manager of your company is not clear about what tasks can be performed by the internal developer you name?**

**are employed as the internal developer of your company. The account manager of your company is not clear about what tasks can be performed by the internal developer you name. Which tasks can be performed by the internal developer you name?**

- A. Viewing graphical reports
- B. Personalizing the user interface
- C. Posting operational data
- D. Development and testing of new code

Answer: C, D

Question: 13

**You work in an international company as an internal developer of Microsoft Dynamics NAV 2009. You are installing the Microsoft Dynamics NAV 2009 database on a server. What are the disadvantages of setting the Microsoft Dynamics NAV 2009 database to auto-grow?**

**are employed as the internal developer of your company, you are installing the Microsoft Dynamics NAV 2009 database on a server. What are the disadvantages of setting the Microsoft Dynamics NAV 2009 database to auto-grow?**

- A. The disadvantage of setting the Microsoft Dynamics NAV 2009 database to auto-grow is that disk space may be used inefficiently.
- B. The disadvantage of setting the Microsoft Dynamics NAV 2009 database to auto-grow is that database performance is decreased.
- C. The disadvantage of setting the Microsoft Dynamics NAV 2009 database to auto-grow is usage of system resources is increased.
- D. The disadvantage of setting the Microsoft Dynamics NAV 2009 database to auto-grow is that execution time of read operations is increased.

Answer: C
