Question: 1

To what does an internal structure of a class refer?

- A. the inheritance structure of that class
- B. the set of nested classifiers of that class
- C. the set of structural features of that class
- D. class and associations owned by that class
- F. the decomposition of that class in terms of interconnected parts

Answer: E

Question: 2

What statements are true about a composite structure? (Choose two)

- A. Collaborations are structured classifiers.
- B. A structured classifier is also an encapsulated classifier.
- C. Structured classifiers cannot contain instances of structured classifiers.
- D. Destroying an instance of a structured classifier normally destroys instances of its parts.
- E. The behavior of a structured classifier must be completely defined through the collaboration of owned or referenced instances.

Answer: A, D

Question: 3

An encapsulated classifier is characterized by which fact?

- A. has an encapsulation shell
- B. can own one or more ports
- C. hides information from other classifiers
- D. acts as a package and can own one or more classifiers

Answer: B

Question: 4

What interface restrictions does a port have?

- A. multiple required interfaces or multiple provided interfaces
- B. multiple provided interfaces and multiple required interfaces
- C. equal numbers of provided interfaces and required interfaces
- D. exactly one provided interface or exactly one required interface
- F. exactly one required interface and exactly one provided interface

2

Answer: B

Question: 5

What is an invocation

- A. sending a message
- B. receiving a message
- C. creating a link between objects
- D. relaying the invocation
- E. invoking the behavior

Answer: D

Question: 6

What is NOT a purpose of a package

- A. serves as an enclosure for elements
- B. specifies an association between elements
- C. hides the internal structure
- D. provides a distinctive environment

Answer: B

Question: 7

Which is true of a port

- A. represents an interface
- B. identifies the set of objects connected via that port
- C. identifies the set of objects connected via that port
- D. identifies the set of objects connected via that port

Answer: C
